62. Narrative of Supplemental Report Narrative: I was contacted by Det. Sanfilippo regarding viewing video footage on an CD-ROM booked into evidence as "mast cam". This video footage was from the ROV (robot) support vehicle that set up at the command post but did not actually send any ROV's into the scene. I analyzed the disc and noted there was data recorded on it in a proprietary format not readily viewable on a standard computer or DVD player. On 04/24/12 I converted the data on this disc to a standardized viewable format (DVD) using the "Speco DVR16ip" DVR unit that was use to originally record the footage. The recorded footage goes from 09:55:01 on 11/17/11 to 10:02:55 on 11/17/11. The footage is of a surveillance camera mounted on the roof of the truck. In my reviewing the footage I noted it showed nothing but the truck's roof and no other video footage of apparent investigative value at the time. The converted footage on DVD was given to Det. Sanfilippo. No additional video footage was captured on the disc at the time it was written by the DVR. No further information.
