

RIVERSIDE FLIGHT PLAN

FALL, 2010

AIRPORT UPDATE

There have been a lot of changes going on over the past several months that affect a majority of the tenants on the Airport. This appears to be a perfect time to update you on those past and future changes

As most of you know, Zenith Flight Support closed their doors a year ago August. During this past year the Airport Administration has been learning on the fly as we have taken over supplying certain FBO services. We now have two fuelers and a Customer Service Rep working at Riverside Premium Flight Services, the name we have selected for the FBO. We are currently working to bring one of the underground storage tanks up to code. As soon as that is completed we plan on again providing truck service 100LL. We have no plans to provide self-serve 100LL since we currently have an excellent provider on the Airport.

For those that don't know, Dr. Gilbert recently passed away. He was at the Airport for over ten years and will be greatly missed.

We have a new tenant coming to the Airport and the name may be familiar to some of you. AIA Flight Center & Training is opening a satellite facility here at Riverside. AIA is currently located at Chino Airport and they believe the time is right to expand to Riverside. They are leasing office space on the first floor of the terminal building and will be open for business the first of October. They will be offering traditional flight training services as well as aircraft rental and pilot supplies. AIA will be a source for sectionals and other charts. For details please visit www.aiaflight.com

To help to be better prepared during an aircraft emergency, we will be having a mock emergency drill on the Airport in October. This training opportunity will allow police and fire to become more familiar with the Airport and the different types of aircraft used at the Airport. The drill will give us the opportunity to work on communication between Police, Fire, Airport Operations and the Control Tower.➔

TERMINAL REMODELING NEARLY COMPLETE

The Terminal remodeling is nearly complete. The terminal seating was the first thing we changed and it is holding up very nicely. The elevator has been completely remodeled including all new mechanicals.

The handicapped parking in front of the terminal has been brought up to current standards and the front awning has been removed. The mural located in the seating area was removed and windows have been restored in that area. Protective metal caps have been installed on all of the protruding exterior beams. New wrought iron gates and fence top has been installed in the patio area and we have removed some old block fencing to open up the area. We have also installed new exterior lighting and landscaped the front of the building.

A new Airport Conference Room has been completed on the first floor of the terminal that includes a custom conference room table. The only remaining items to be completed include painting the first floor interior of the terminal building and installing new carpet. Everything should be completed by the end of October.➔

LAUREN COOPER	2

AIRPORT WELCOMES NEW FBO CUSTOMER SERVICE REPRESENTATIVE

Please join us in welcoming Lauren Cooper to the Riverside Municipal Airport. Lauren began her journey with the City at the early age of 16 when she was hired as a lifeguard and swim instructor. Upon graduation from UCSB, Lauren returned to the City of Riverside and comes to us most recently from the Parks & Recreation Department, as an Assistant Coordinator. Lauren will oversee Riverside Premium Flight Services and assist any clientele that visit the FBO.

When she's not busy at work, Lauren enjoys being outdoors and traveling.

Lauren will also be heading back to graduate school this fall at Cal State Fullerton to complete her master's degree in Higher Education.

We are excited to add Lauren to the Airport family and encourage you to stop by and give her a warm Airport welcome! ➔

RIVERSIDE PREMIUM FLIGHT SERVICES

RPFS offers superior customer service and operations to all aviation clientele. We strive to make your visit as pleasant as possible whether you are planning an extended stay or just passing through-our friendly and professional staff is here to assist you in planning your travel arrangements. We can schedule rental car or limousine services, hotel accommodations, catering and any other services that you may need.

Our newly remodeled FBO lounge offers a peaceful setting for both passengers and crew members. Put your feet up and relax in our TV lounge while watching the latest shows on our flat screen HD television, enjoy a chilled beverage or snack, rest in our serene snooze room. Need meeting space? RPFS also has a large conference room complete with a custom designed MotoArt conference table and large flat screen television with laptop connectivity.
