Specialized Equipment: Breathing Support		

CURRENT SITUATION

(Recent updates are posted at the top of Current Situation)

City of Riverside Fire units were dispatched to a reported structure fire with a possible victim trapped. The first arriving engine company was met by the reporting party who relayed the last know location of the victim, which was a bedroom. Fire crews made an aggressive interior fire attack in conjunction with search and rescue operations. Additional units assisted with search and fire suppression operations when they arrived. Crews reported locating a victim, who had expired, in the bedroom area. The reporting party, who was also the full time caretaker for the resident, and a neighbor, attempted to rescue the occupant prior to the arrival of fire department personnel. Both civilian rescuers were treated and transported for smoke inhalation which occurred during the attempted rescue. Cause of fire is currently under investigation.
