

# Discovery Days

**July - October 2013**  
**Season Activities List**  
(Activities are subject to change)

FREE!

3rd Wednesday of Every Month  
1:30 pm - 4:30 pm  
Designed for Kids 10 and under

## July 17- Why are Leaves Green?

All living things need to eat food for energy but how do plants get their food? We'll find out why plants need sunlight and soil to survive. Make your own plant cell and find out where the amazing process of photosynthesis takes place!

## August 21- Rocks and Minerals

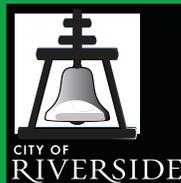

What is a geologist? Discover some of the different rocks and minerals that are on planet earth. Learn about why some rocks float and why others look like a layer cake and what exactly is the difference between a rock and a mineral? We'll also explore some rocks and minerals that are found here in Riverside.

## September 18- Worms do what?!

They eat trash and dirt, and their poop is magical for your garden! We'll observe worms and learn about their preferred habitats. Plant a vegetable to take home and learn how to create your own compost pile to make your garden an inviting place for worms!

## October 16- Who Lives Underground?

We'll be taking a look at the mysterious world of creatures that make their homes under our feet. From insects to rodents, how do these animals survive in the deep, dark world underground?

RIVERSIDE METROPOLITAN  
**MUSEUM**
