

# Eastbound Riverside (91) Freeway at Van Buren closing on Saturday night

Nighttime traffic in Riverside might be a little heavier than normal Saturday because of a detour planned along Riverside (91) Freeway at Van Buren Boulevard.

Construction crews will close the Eastbound lanes at approximately 11:30 p.m. so workers can install beams in a bridge as part of the widening of the Van Buren Avenue overpass. The lanes are scheduled to reopen at 7:30 a.m. on Sunday.

Drivers will be routed off at Van Buren and can immediately re-enter the freeway. Van Buren will remain open as long as traffic is moving.

## About the Van Buren / Riverside Freeway Overpass

The project will widen the bridge over the Riverside Freeway to six lanes with dual left turn lanes. The westbound ramps will also be widened to three lanes. A new eastbound onramp will be constructed on Indiana Avenue. These changes will make access to the Riverside Freeway faster and easier.

In addition to traffic flow improvements, this project will also beautify the interchange by building new retaining walls and utilizing water-wise plant material for landscaping.
