Riverside's Renaissance is well underway!

Just six months after the City Council approved the most sweeping initiative in Riverside's history, \$754 million has been put to work in projects throughout our City. Already, \$11 million worth of projects are complete. Construction crews are building an additional \$186 million in improvements, while Design Teams prepare an additional \$496 million in upgrades throughout our 26 neighborhoods and the roadways that connect them.

And more improvements lie ahead, as the City moves at record pace on nearly \$1.3 billion worth of projects to further enhance quality of life for all Riverside residents.

Please join the excitement by tracking the success of the Riverside Renaissance with the information below. Watch for further updates in coming months, as your City completes 30 years' worth of public improvements in just five years. Riverside's Renaissance is improving public facilities, paving more roads than ever before, upgrading water and electric systems, renovating parks and enhancing every neighborhood. Renaissance...just another reason why Riverside is the capital of the Inland Empire, and a City in which we all take pride.
