

Magnolia Avenue Specific Plan

Plan for the Future and Preserve the Past

Join us for an engaging community workshop!

- In June 2004, over 120 residents participated in the first of three public workshops to share ideas on how to best revitalize the Magnolia Avenue corridor and recapture its grandeur.
- In April 2007, 48 residents participated in a second public workshop on the initial draft of the specific plan which incorporated what was heard at the first workshop, including:
 - Improvement of existing traffic/parking problems
 - Enhancement of unique characteristics of districts
 - Establishment of efficient transportation modes (transit, walking, biking)
 - Creation of a more pedestrian environment
 - Enhancement of street aesthetics/greener corridor
- Comments and suggestions provided at the second workshop were considered and adjustments were made to the Plan. All residents interested in the future of this important corridor are invited to attend the **THIRD WORKSHOP** to review and discuss the final Draft Plan.
