Selected Economic Characteristics: 2005

Data Set: 2005 American Community Survey

Survey: 2005 American Community Survey

NOTE: Data are limited to the household population and exclude the population living in institutions, college dormitories, and other group quarters. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see [Survey Methodology](#).

Selected Economic Characteristics: 2005	Estimate	Margin of Error
EMPLOYMENT STATUS		
Population 16 years and over	219,904	+/-11,295
In labor force	148,677	+/-10,129
Civilian labor force	148,564	+/-10,135
Employed	136,376	+/-9,346
Unemployed	12,188	+/-2,384
Armed Forces	113	+/-132
Not in labor force	71,227	+/-4,734
Civilian labor force	148,564	+/-10,135
Unemployed	8.2%	+/-1.4
Females 16 years and over		
Population 16 years and over	111,067	+/-5,902
In labor force	65,871	+/-5,468
Civilian labor force	65,871	+/-5,468
Employed	59,464	+/-4,764
Own children under 6 years		
Population 16 years and over	25,616	+/-3,216
All parents in family in labor force	15,237	+/-2,759
Own children 6 to 17 years		
Population 16 years and over	50,415	+/-4,929
All parents in family in labor force	33,110	+/-4,359
COMMUTING TO WORK		
Workers 16 years and over	131,742	+/-9,230
Car, truck, or van -- drove alone	96,279	+/-7,488
Car, truck, or van -- carpooled	23,936	+/-4,056
Public transportation (excluding taxicab)	2,517	+/-1,379
Walked	2,854	+/-946
Other means	1,639	+/-632
Worked at home	4,517	+/-1,607
Mean travel time to work (minutes)	29.3	+/-1.7
Civilian employed population 16 years and over	136,376	+/-9,346
OCCUPATION		
Management, professional, and related occupations	37,143	+/-3,889
Service occupations	24,337	+/-3,613
Sales and office occupations	32,186	+/-3,790
Farming, fishing, and forestry occupations	74	+/-123
Construction, extraction, maintenance and repair occupations	17,086	+/-3,231
Production, transportation, and material moving occupations	25,550	+/-3,908

Selected Economic Characteristics: 2005	Estimate	Margin of Error
INDUSTRY		
Agriculture, forestry, fishing and hunting, and mining	1,236	+/-881

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Notes:

- The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.
- Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to [Labor Force Guidance](#).
- Workers include members of the Armed Forces and civilians who were at work last week.
- Occupation codes are 4-digit codes, but are still based on Standard Occupational Classification 2000.
- Industry codes are 4-digit codes and are based on the North American Industry Classification System 2002. However, the Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Explanation of Symbols:

1. An '*' entry in the margin of error column indicates that too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '**' entry in the margin of error column indicates that no sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
3. An '-' entry in the estimate column indicates that no sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
4. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
5. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
6. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
7. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
8. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the

number of sample cases is too small.

9. An '(X)' means that the estimate is not applicable or not available.
