

NOTES:

1. Cross slopes and longitudinal slopes shall be as directed by the Engineer and in such a manner as to provide for adequate drainage and smooth riding characteristics. Cross slope shall not be less than 2% nor more than 5%.
2. The minimum width of the bikeway shall be 8' for a two-way bikeway and 5' minimum width per highway design manual for a one-way bikeway unless otherwise shown on plan.
3. Location and alignment of bikeway shall be as shown on plans.
4. All tree limbs overhanging the bikeway and less than 8' above the bikeway shall be trimmed back as directed by the Engineer. Minimum lateral clearance to obstructions shall be 3'.
5. Asphaltic Concrete shall be Class D2-PG-64-10.
6. Prior to placing asphaltic concrete, apply an approved herbicide, rate of application per manufacturers recommendations.
