

Smart Savings from Riverside Public Utilities

“VendingMiser®” Direct Install Program

Riverside Public Utilities (RPU) is offering qualifying commercial electric customers FREE installation of energy conservation devices on all refrigerated vending machines (VendingMiser®) and glass door coolers (CoolerMiser®).

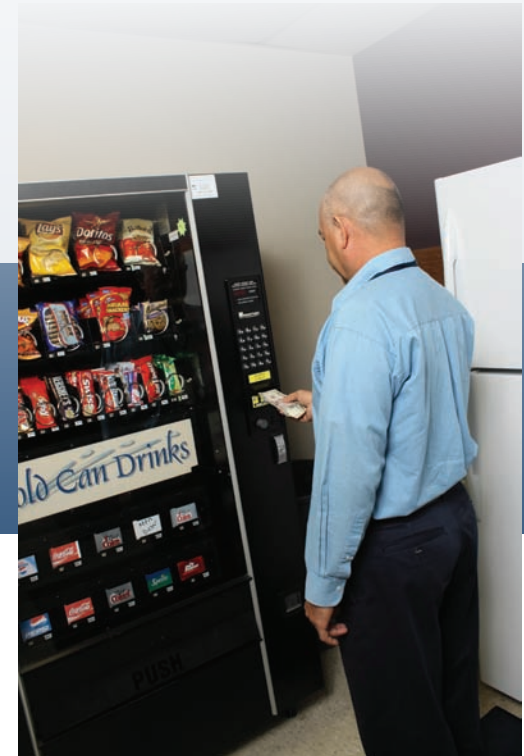

Vending Miser® offers:

- Quick, inexpensive energy savings and conservation
- Compatibility with a variety of cold drink vending machines and glass door coolers
- Longer machine lifespan
- Reduced maintenance costs
- Environmental benefits

By using a simple plug-in device, businesses can cut energy usage by nearly 46 percent, saving up to \$150 per vending machine and \$100 per glass door cooler each year!

Using a passive infrared sensor, the EnergyMiser® cycles down the machine when the surrounding area is vacant, monitors the room’s temperature, and automatically re-powers the cooling system to ensure the products stay cold.

And now, Riverside Public Utilities is offering **FREE** VendingMiser® installations to qualifying commercial energy customers while supplies last (some restrictions apply).

WATER | ENERGY | LIFE
