July 27, 2012

**Subject: Notice of Suspension of the Santa Ana River Power Project**

On July 11, 2012 the City of Riverside Public Utilities (RPU) released a Notice of Intent to adopt mitigated negative declaration for the Santa Ana River Power Project for the City of Riverside, California.

As the Lead Agency for the proposed Santa Ana River Power Relocation Project (Project), RPU directed the preparation of an Initial Study/Mitigated Negative Declaration (IS/MND) in compliance with the California Environmental Quality Act (CEQA).

RPU was proposing the Project to secure reliable and unrestricted access to the power lines that are currently located within the Santa Ana River area.

This letter is to inform you that the Project is indefinitely suspended so other options can be explored and alternatives can be evaluated and studied.

If you have any questions, concerns, or issues related to the suspension of the Project, please contact:

Daniel Honeyfield, P.E., Utilities Senior Electrical Engineer  
Riverside Public Utilities  
3750 University Avenue, 4th Floor  
Riverside, CA 92501
