

**SCHEDULE CS**  
**CONTRACT SERVICE**

**Applicability:**

Applicable to service for all types of uses, including lighting, power, and heating, alone or combined.

Offered to non-residential end-use customers or certain groups of non-residential end-use customers with demand in excess of 500 kilowatts per month.

**Territory:**

City of Riverside

**Rates:**

Specific formulas and rates shall be set forth in the service contract approved by the Board of Public Utilities and City Council and on file with the City Clerk. Rates shall be designed to meet the calculated revenue requirements for generation, transmission, and distribution services. Revenue requirements shall be based on the actual cost to serve the customer, including, but not limited to, all power costs (including stranded costs), operating and maintenance expenses, administrative and general costs, and applicable payments in lieu of taxes or other payments to the City as may be determined in the future. The rate fixed in each contract shall not be subject to change by either customer or the City on the basis of changes in the City's revenue requirements.

**Special Conditions:**

**1. Contract:**

Each customer served under Schedule CS – Contract Service shall sign a service contract with the City of Riverside which specifies the terms and conditions of such service.

**2. Term:**

Service contracts shall not be less than one year nor greater than ten years in length. Service will not be offered under the terms of Schedule CS unless mutually agreed upon by the Department of Public Utilities and the customer.

**3. State Mandated Public Benefits Charge:**

The rates above are subject to a surcharge (Public Benefits Charge) as adopted via Resolution No. 19203 by the City Council on December 9, 1997 and such surcharge as is in effect from time to time. The Public Benefits Charge will be applied to the Customer's total electricity usage charges for the applicable billing period.

**4. Power Cost Adjustment Factor:**

The rates above are **not** subject to the Power Cost Adjustment Factor.

**5. Rate Applicability to Groups:**

The rates above are applicable only to those groups of non-residential end-use customer that consist of:

- 1) Fifteen (15) or fewer non-residential end-use customers with like business operations, which have a group demand of at least 500 kilowatts per month; or
- 2) non-residential end-use customers with dissimilar business operations, each of which have an individual demand of at least 500 kilowatts per month.

**6. Applicable Rate Schedule:**

**a. Applicable Rate Schedule**

For Customers applying for service at an existing service address, the Utility will assign the electric rate schedule based on the characteristics of the service address. The Utility will presume that any electric rate previously assigned to that service address is the appropriate schedule, unless Customer requests a review for another applicable rate schedule, rate, or optional provision. In certain situations when a Customer does not qualify for an electric rate previously assigned to that service address, the Utility will assign the applicable rate to the Customer. The Utility assumes no responsibility for advising the Customer of lower optional rates under existing schedules available as a result of the Customer's changes to the characteristics of the service address.

**b. Change of Rate Schedule**

A change to the applicable rate schedule may be made if the Utility determines that the Customer no longer qualifies for the assigned rate schedule. Subject to meter availability, the change will become effective for service rendered after the next regular meter reading following verification and approval by the Utility of such eligibility. Any change in rate schedules pursuant to this section shall be made prospectively only.
