

SCHEDULE PA

POWER - AGRICULTURAL AND PUMPING

Applicability:

Applicable to power service for general agricultural or for general water or sewerage pumping.

Territory:

City of Riverside

Rates:

<u>Horsepower of Connected Load</u>	<u>Service Charge Per HP Per Year</u>	<u>Energy Charge – Cents per KWH (to be added to Service Charge)</u>	
2 horsepower (minimum)	\$23.67	All KWH, per KWH	\$0.0826

Minimum Charge:

The annual minimum charge shall be the annual service charge.

Special Conditions:

1. **Voltage:**

This rate applies to service rendered at 220 volts or over. All necessary transformers to provide such voltage to be installed, owned and maintained by the City.

2. **Connected Load:**

Connected load is the sum of the rated capacities of all of the customer's equipment that it is possible to connect to the City's lines at the same time, determined to the nearest 1/10 hp. In no case will the charges be based on less than 2 hp. The rated capacity of the customer's equipment will be the rated horsepower output of standard rated motors and the rated kilovolt ampere input capacity of other equipment, with each kva of input considered equal to 1 hp. Normally such rating will be based on the manufacturer's rating as shown on the nameplate or elsewhere but may, at the option of the City, be based on tests or other reliable information.

3. **Overloaded Motors:**

Whenever, upon test, any motor under normal operating condition is found to be delivering more than 115 percent of its capacity as indicated by its nameplate rating, the City may disregard the nameplate rating and base its charges upon the output as calculated from test. Any motor which is billed on a basis in excess of its nameplate rating in accordance with this special condition shall be tested each

year thereafter or upon notification by the customer of a permanent change in operating conditions.

4. Temporary Reduction of Connected Load:

Where the use of energy is seasonal or intermittent, no adjustment will be made for any temporary reduction of connected load. Any customer resuming service on such connected load within 12 months after it was disconnected will be required to pay all charges which would have been billed if the temporary reduction of connected load had not been made.

5. Payment of Service Charges:

The annual service charge will be payable in six equal monthly installments beginning with the month of May each year, except where the usage normally occurs at some other period than the summer months the installments may begin at start of the service year at customer's option.

6. Power Cost Adjustment Factor:

The rates above are subject to a surcharge as provided for in Part C of the General Provisions. The applicable Power Cost Adjustment Factor set forth therein will be applied to all KWH billed under this schedule and shall be added to (or subtracted from) the Energy Charge.

7. State Mandated Public Benefits Charge:

The rates above are subject to a surcharge (Public Benefits Charge) as adopted via Resolution No. 19203 by the City Council on December 9, 1997 and such surcharge as is in effect from time to time. The Public Benefits Charge will be applied to the Customer's total electricity usage charges for the applicable billing period.
