

**SCHEDULE WA-10**

**RECYCLED WATER SERVICE**

**APPLICABILITY:**

Applicable to all retail recycled (reclaimed, non-potable) water service for irrigation, commercial or industrial use.

**TERRITORY:**

City of Riverside and contiguous area.

**RATES:**

**A. Basic Area (Inside City)**

<u>Quantity Rates</u> (to be added to Customer Charge)		<u>Per 100 Cubic Feet</u>
Existing Customers Commodity Charge per month		\$0.30
Future Customers Commodity Charge		Contract Rate
<u>Customer Charge</u>		<u>Per Meter, Per Month</u>
1. Existing Customers		
All meter sizes through	4-inch	\$178.93
	6-inch	357.87
	8-inch	572.59
	10-inch	825.24
2. Future Customers		
All meter sizes		Contract Rate

**B. Surcharge Area Outside City**

Charges shall be the amount computed at the Quantity Rates for Future Customers and the Customer Charge set forth in the Basic Area of this schedule multiplied by 1.5.

## **SPECIAL CONDITIONS**

### 1. Obligation to Supply Recycled Water

The Water Utility will provide recycled water service under this schedule only when and where such recycled water is available and can be supplied at a reasonable cost in accordance with Water Rule 18.

In determining reasonable cost, the Water Utility may consider all relevant factors, including but not limited to, the present and projected costs of supplying recycled water. Grants or subsidies may be used to reduce total development costs.

### 2. Continuity of Service and Water Quality

There is no guarantee of continuous service nor uniform quality of recycled water; therefore, the Customer must have a separate service connection for potable water.

### 3. Applicability of Rules and Regulations

The applicability and provision of recycled water service under this schedule is subject to rules and regulations adopted from time to time by the Board of Public Utilities, including without limitation Water Rule 18 (Recycled Water Rules).

### 4. Water Conservation and Reclamation Surcharge

The rates and charges above are subject to a surcharge (Water Conservation and Reclamation Surcharge) as adopted via City Council Resolution No. 20695 on May 25, 2004 and such surcharge as is in effect from time to time. The Water Conservation and Reclamation Surcharge will be applied to the Customer's total water usage charge including without limitation the quantity rates, customer and minimum charge for the applicable billing period.

### 5. Definitions

a. Contract Rate. The Contract Rate shall mean the Commodity Charge for Recycled Water as established under individual recycled water contracts with Future Customers approved by the Board of Public Utilities and approved by the City Council. The Contract Rate shall be calculated to provide for the Utilities recovery of all City funded costs associated with the production, additional treatment,

transmission and distribution of recycled water to individual Future Customers, and the general fund transfer.

b. Existing Customers. Existing Customers shall mean those Customers of the Water Utility with a recycle water connection(s) to the City's Off-Site Facilities (as defined in Water Rule 18) and receiving water from the City, as of June 1, 2004.

c. Future Customers. All customers, except for Existing Customers, requesting recycled water from the Water Utility.

### **ENERGY COST ADJUSTMENT FOR PUMPING WATER:**

The Quantity Rates shall be subject to an energy cost adjustment relating to increases and decreases in the cost of electric power for pumping water. This energy cost adjustment shall apply to each one hundred cubic feet (CCF) of sales to which Quantity Rates apply. Determination of the adjustment factor shall be made at the beginning of each quarter, with the initial adjustment beginning February 1, 1983. The energy cost adjustment shall be calculated by dividing the CCF of metered water sold in each quarter into the total dollar amount of fuel cost adjustments plus any base rate increases imposed by power suppliers for pumping water during that quarter:

- A. Fuel cost adjustment charges by Southern California Edison Company.
- B. Fuel cost surcharge charges by City of Riverside.
- C. Base rate increase charges by Southern California Edison Company.\*
- D. Base rate increase charges by City of Riverside. \*

$$\frac{\$(A+B+C+D)}{\text{CCF (Metered Sales)}} = \$.0000 \text{ per CCF}$$

The resultant shall be the energy cost adjustment factor for pumping water and shall be expressed in terms of cents per CCF carried out to the nearest \$0.0001. This factor shall be divided by 0.885 to allow for the 11.5% of gross revenue payable to the City General Fund. The resultant shall then become the energy cost adjustment to be multiplied by all CCF increments reported in billings to Customers. The resultant amount in each case, expressed to the nearest \$.01, shall constitute the adjustment to be added to the Customer's bill.

\* (Over base rates in effect February 1, 1983)
