## **Draft Negative Declaration**

WARD: 6

- 1. Case Number: P14-0682 (Conditional Use Permit)
- 2. **Project Title:** Velvet Wireless Telecommunications Facility
- 3. Hearing Date: October 8, 2015

City of Riverside Community Development Department Planning Division 3900 Main Street, 3<sup>rd</sup> Floor Riverside, CA 92522

- 5. Contact Person:<br/>Phone Number:Gaby Adame, Assistant Planner<br/>(951) 826-5933
- 6. **Project Location:** 4920 Jackson Street and situated southwesterly of the Colony Place and Jackson Street intersection, in the CR—Commercial Retail Zone.

## 7. Project Applicant/Project Sponsor's Name and Address:

Property Owner Margarita Lopez 4920 Jackson Street Riverside, CA 92503 <u>Applicant</u> Verizon Wireless 15505 Sand Canyon Avenue Bldg. D, First Floor Irvine, CA 92618 Representative Chris Colten Spectrum Services 4405 Airport Way, Suite 100 Ontario, CA 91761

## 8. General Plan Designation: C- Commercial

- 9. Zoning: CR- Commercial Retail Zone
- 10. Description of Project:

The applicant is requesting a Conditional Use Permit (CUP) to allow the construction of a 60-foot high wireless telecommunications facility camouflaged as a pine tree and related equipment enclosure, within an approximately 800 square foot enclosure. The proposed lease area is situated towards the southeasterly portion of the property alongside the Jackson Street right-of-way, and approximately 228 feet from Van Buren Boulevard. The facility, including all related ground mounted equipment, will be located on-site at grade level.

The monopine as proposed will consist of a single antenna array installed at a centerline height of approximately 50-feet above ground level. The antenna array will consist of twelve (12) antennas, attached to three (3) separate sectors. In addition, twenty-four (24) RRU's will be added to the back side of the antenna arrays and a parabolic antenna will be mounted onto the pole below the twelve (12) antennas. The pole of the monopine will consist of a faux bark finish to resemble the texture and color of a pine tree trunk. Faux branches and leaves are proposed to extend out beyond the antenna arrays to camouflage the antennas.

The proposal also includes the installation of an approximately 800 square-foot equipment enclosure. The enclosure is proposed to accommodate new radio equipment cabinets as well as supporting cables and utilities behind a decorative 8-foot high masonry wall. A metal gate is proposed along the westerly side of the enclosure for access to the support equipment.

## 11. Surrounding land uses and setting: Briefly describe the Project's surroundings:

The project site is approximately 7.56 acres, and is developed with an existing industrial use, surface parking and landscaping.

	Existing Land Use	General Plan Designation	Zoning Designation
Project Site	Restaurant/Surface Parking Lot	C-Commerical	BMP SP- Business and Manufacturing Park, Hunter Business Park Specific Plan
North	Commercial/Surface Parking Lot	C-Commerical	BMP SP- Business and Manufacturing Park, Hunter Business Park Specific Plan
East	Residential	MHDR-Medium High Density Residential	BMP SP- Business and Manufacturing Park, Hunter Business Park Specific Plan
South	Commercial/Surface Parking Lot	C-Commerical	R-1-7000 R-3-1500
West	Commercial/Surface Parking Lot	C-Commerical	BMP SP- Business and Manufacturing Park, Hunter Business Park Specific Plan

12. Other public agencies whose approval is required (e.g., permits, financial approval, or participation agreement.):

## ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this Project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

Aesthetics	Agriculture & Forest Resources	Air Quality
Biological Resources	Cultural Resources	Geology/Soils
Greenhouse Gas Emissions	Hazards & Hazardous Materials	Hydrology/Water Quality
Land Use/Planning	Mineral Resources	Noise
Population/Housing	Public Service	Recreation
Transportation/Traffic	Utilities/Service Systems	Mandatory Findings of Significance

**DETERMINATION:** (To be completed by the Lead Agency)

On the basis of this initial evaluation which reflects the independent judgment of the City of Riverside, it is recommended that:

The City of Riverside finds that the proposed Project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

The City of Riverside finds that although the proposed Project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the Project have been made by or agreed to by the Project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

The City of Riverside finds that the proposed Project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

The City of Riverside finds that the proposed Project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

The City of Riverside finds that although the proposed Project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed Project, nothing further is required.

## **COMMUNITY DEVELOPMENT DEPARTMENT** Planning Division

City of Arts & Innovation

## **Environmental Initial Study**

## EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to Projects like the one involved (e.g., the Project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on Project-specific factors as well as general standards (e.g., the Project will not expose sensitive receptors to pollutants, based on a Project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as Project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
  - a. Earlier Analysis Used. Identify and state where they are available for review.
  - b. **Impacts Adequately Addressed.** Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
  - c. **Mitigation Measures.** For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measure which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the Project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) The explanation of each issue should identify:
  - a. the significance criteria or threshold, if any, used to evaluate each question; and
  - b. the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------------	--	------------------------------------	--------------

3c. Response: (Source: General Plan 2025 FPEIR Table 5.3-B SCAQMD CEQA Regional Significance Thresholds, South Coast Air Quality Management District's 2007 Air Quality Management Plan, CalEEMod Model)

Per the GP 2025 FPEIR, AQMP thresholds indicate future construction activities under the General Plan are projected to result in significant levels of NO<sub>x</sub> and ROG, both ozone precursors, PM-10, PM-2.5, and CO. Although long-term emissions are expected to decrease by 2025, all criteria pollutants remain above the SCAQMD thresholds.

The portion of the Basin within which the City is located is designated as a non-attainment area for ozone, PM-10 and PM-2.5 under State standards, and as a non-attainment area for ozone, carbon monoxide, PM-10, and PM-2.5 under Federal standards.

Because the proposed Project is consistent with the General Plan 2025, cumulative impacts related to criteria pollutants as a result of the Project were previously evaluated as part of the cumulative analysis of build out anticipated under the General Plan 2025 Program. As a result, the proposed Project does not result in any new significant impacts that were not previously evaluated and for which a statement of overriding considerations was adopted as part of the General Plan 2025 FPEIR. Further per the response in 3B above, an air quality model conducted using CaLEEMod found the project emissions (short-term and long-term) to the SCAQMD daily thresholds and shows that established thresholds will not be exceeded. Therefore, cumulative air quality emissions impacts are **less than significant**.

d.	Expose	sensitive	receptors	to	substantial	pollutant			$\boxtimes$	
	concentra	ations?								

3d. Response: (Source: General Plan 2025 FPEIR Table 5.3-B SCAQMD CEQA Regional Significance Thresholds, South Coast Air Quality Management District's 2007 Air Quality Management Plan)

Short-term impacts associated with construction from General Plan 2025 typical build out will result in increased air emissions from grading, earthmoving, and construction activities. Mitigation Measures of the General Plan 2025 FPEIR requires individual development to employ construction approaches that minimize pollutant emissions (e.g., watering for dust control, tuning of equipment, limiting truck idling times). Additionally, the Project will not result in the violation of any ambient air quality standard or contribute substantially to an existing or projected air quality violation because the Project is proposed on a previously developed site and does not involve substantial grading or earthmoving activities and because the Project consists of wireless telecommunications facility. Therefore, the Project will not expose sensitive receptors to substantial pollutant concentrations and a **less than significant impact** will occur directly, indirectly or cumulatively from this Project.

e. Create objectionable odors affecting a substantial number of people?				$\boxtimes$
---	--	--	--	-------------

#### 3e. Response:

The Project would not expose a substantial number of people to objectionable odors because no odors are anticipated to be generated by the proposed use. Therefore, **no impact** to creating objectionable odors will occur directly, indirectly or cumulatively.

4. <b>BIOLOGICAL RES</b> Would the Project:	OURCES.		
habitat modifications candidate, sensitive, regional plans, policie	verse effect, either directly or through , on any species identified as a or special status species in local or s, or regulations, or by the California nd Game or U.S. Fish and Wildlife		$\boxtimes$

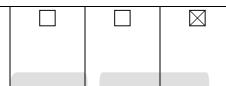

4a. Response: (Source: General Plan 2025 – Figure OS-6 – Stephen's Kangaroo Rat (SKR) Core Reserve and Other Habitat Conservation Plans (HCP), Figure OS-7 – MSHCP Cores and Linkages, Figure OS-8 – MSHCP Cell

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
---	--------------------------------------	--	------------------------------------	--------------	--

Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Area Plans, Figure 5.4-4 - MSHCP Criteria Cells and Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Plant Species Survey Area, Figure 5.4-7 – MSHCP Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP Burrowing Owl Survey Area)

The project site is located within an urban built-up area and is primarily surrounded by existing development. A search of the MSHCP database and other appropriate databases identified no potential for candidate, sensitive or special status species, suitable habitat for such species on site, Federal Species of Concern, California Species of Special Concern, and California Species Animal or Plants on lists 1-4 of the California Native plant Society (CNPS) Inventory. Thus there is little chance that any Federally endangered, threatened, or rare species or their habitats could persist in this area. Therefore, **no impact** directly, indirectly and cumulatively will occur to federally endangered threatened, or rare species or their habitats.

b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?

4b. Response: (Source: General Plan 2025 – Figure OS-6 – Stephen's Kangaroo Rat (SKR) Core Reserve and Other Habitat Conservation Plans (HCP), Figure OS-7 – MSHCP Cores and Linkages, Figure OS-8 – MSHCP Cell Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Area Plans, Figure 5.4-4 - MSHCP Criteria Cells and Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Plant Species Survey Area, Figure 5.4-7 – MSHCP Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP Burrowing Owl Survey Area, MSHCP Section 6.1.2 - Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools)

The project is located on a fully developed site and is not identified as being within any MSCHP Criteria Cells or those that would affect riparian habitat or other sensitive natural community identified in local or regional plans. Therefore, the Project will have **no impact** directly, indirectly and cumulatively will occur related to any riparian habitat or other sensitive natural community with implementation of the proposed project.

wetla (incluence)	nds as defined by Section uding, but not limited to,	ffect on federally protected 404 of the Clean Water A marsh, vernal pool, coasta oval, filling, hydrologic	et I,			
----------------------	---	---	----------	--	--	--

#### 4c. Response: (Source: City of Riverside GIS/CADME USGS Quad Map Layer)

The Project is located within an urbanized area where no federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) exist on site or within proximity to the Project site. The Project site does not contain any discernible drainage courses, inundated areas, wetland vegetation, or hydric soils and thus does not include USACOE jurisdictional drainages or wetlands. Therefore, the proposed Project would have **no impact** to federally protected wetlands as defined by Section 404 of the Clean Water Act directly, indirectly and cumulatively.

d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

#### 4d. Response: (Source: MSHCP, General Plan 2025 – Figure OS-7)

The Project site is located within an urban built-up area and is not within an MSHCP linkage area. Further, no candidate, sensitive, species of concern, or special status species or suitable habitat for such species occurs on site and no additional surveys or mitigation measures are required. Therefore, there is little chance that the Project would interfere with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites. Therefore, a **no impact** directly, indirectly and cumulatively will occur related to the movement of any native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites will occur with implementation of the proposed Project.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				
4e. Response: (Source: MSHCP, Title 16 Section 16.72.040 - Mitigation Fee, Title 16 Section 16.40.040 – Establishing Riverside Urban Forest Tree Policy Manual)	a Threatened	d and Endang	gered Species	Fees, City of

5b. Response: (Source: GP 2025 FPEIR Figure 5.5-1 - Arch Cultural Resources Sensitivity, Appendix D – Cultural Reso The Project does not involve substantial development, grading activit	ources Study)		_	

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
resources as defined in Section 15064.5 of the CEQA Guidelines. However, a condition of approval will be required for construction activities to be halted and a qualified archaeologist to be hired should cultural, historical or archaeological items be found during grading and construction activity. If human remains are found during the grading, the Native American Graves Protection Act Guidelines and State law require that construction personnel halt work in the immediate area; leave the remains in place; contact the City Manager, the City Historic Preservation Officer, and the Riverside County Coroner. Therefore, impacts to historical resources are <b>less than significant</b> directly, indirectly and cumulatively.						
c. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			$\square$			
<b>5c. Response:</b> ( <i>Source: General Plan 2025 Policy HP-1.3</i> ) The Project does not involve substantial development, grading activities, or structures that would result in impacts to historic resources as defined in Section 15064.5 of the CEQA Guidelines. However, a condition of approval will be required for construction activities to be halted and a qualified archaeologist to be hired should cultural, historical or archaeological items be found during grading and construction activity. If human remains are found during the grading, the Native American Graves Protection Act Guidelines and State law require that construction personnel halt work in the immediate area; leave the remains in place; contact the City Manager, the City Historic Preservation Officer, and the Riverside County Coroner. Therefore, impacts to historical resources are <b>less than significant</b> directly, indirectly and cumulatively.						
d. Disturb any human remains, including those interred outside of formal cemeteries?						
<i>Cultural Resources Sensitivity, Archaeological Survey Report)</i> The proposed wireless telecommunications facility (monopine) is proposed to be constructed on a property already disturbed and currently developed with industrial buildings and a surface parking lot. A condition of approval will be required for construction activities to be halted and a qualified archaeologist to be hired should cultural, historical or archaeological items be found during grading and construction activity. If human remains are found during the grading, the Native American Graves Protection Act Guidelines and State law require that construction personnel halt work in the immediate area; leave the remains in place; contact the City Manager, the City Historic Preservation Officer, and the Riverside County Coroner. With implementation of the recommended condition of approval, less than significant impacts are expected.						
6. GEOLOGY AND SOILS. Would the Project:						
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:						
<ul> <li>Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.</li> </ul>						
6i. Response: (Source: General Plan 2025 Figure PS-1 Appendix E – Geotechnical Report)	– Regional Fo	ault Zones &	General Plan	2025 FPEIR		
Seismic activity is to be expected in Southern California. ISSUES (AND SUPPORTING	Potentially Significant	Less Than Significant	Less Than Significant	No Impact	
INFORMATION SOURCES):	Impact	With Mitigation Incorporated	Impact		
The San Jacinto Fault Zone located in the northeastern portion of the City and the Elsinore Fault Zone, located in the southern portion of the City's Sphere of Influence, have the potential to cause moderate to large earthquakes that would cause intense ground shaking. Because the proposed Project complies with California Building Code regulations, impacts associated with strong seismic ground shaking will have <b>no impact</b> directly, indirectly and cumulatively.					
iii. Seismic-related ground failure, including liquefaction?			$\square$		
<ul> <li>6iii. As such, the Project will have less than significant impacts resulting in a geologic unit or soil becoming unstable resulting in an in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse either directly, indirectly or cumulatively.</li> </ul>					
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			$\square$		
<ul> <li>6d. Response: (Source: General Plan 2025 FPEIR Figure 5.6-4 – Soils, Figure 5.6-4 – Soils, Table 5.6-B – Soil Types, Figure 5.6-5 – Soils with High Shrink-Swell Potential, Appendix E – Geotechnical Report, and California Building Code as adopted by the City of Riverside and set out in Title 16 of the Riverside Municipal Code)</li> <li>Expansive soil is defined under California Building Code. The soil type of the subject site is defined as Porterville soil (See Figure 5.64 – Soils of the General Plan 2025 Program Final PEIR.) which is known to have a high shrink-swell potential. Compliance with applicable provisions of the City's Subdivision Code- Title 18 and the California Building Code with regard to soil hazards related to the expansive soils will be reduced to a less than significant impact level for this Project directly, indirectly and cumulatively.</li> </ul>					
e. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste					

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
water?					
<b>6e. Response:</b> ( <i>Source: General Plan 2025 FPEIR Figure 5.6</i> The proposed Project will be served by sewer infrastructure. Therefore					
	T		T	r	
7. GREENHOUSE GAS EMISSIONS. Would the Project:					
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?					
<b>7a. Response:</b> The proposed Project involves the construction of a wireless telecommunications facility. The Project is consistent with the City's General Plan 2025 policies and statewide Building Code requirements designed to reduce GhG emissions. Since the Project will not result in a net increase in GhG emissions, it will not interfere with the State's goals of reducing greenhouse gas emissions to 1990 levels by the year 2020 as stated in AB 32 and an 80 percent reduction in GhG emissions below 1990 levels by 2050 as stated in Executive Order S-3-05. Projects that are consistent with the Projections of employment and population forecasts identified by the SCAG are considered consistent with the AQMP growth Projections, since these forecast numbers were used by SCAG's modeling section to forecast travel demand and air quality for planning activities such as the RTP, the SCAQMD's AQMP, RTIP, and the Regional Housing Plan. This Project is consistent with the Projections of employment and population forecasts. Therefore, this Project will have <b>less than significant</b> impacts with respect to GhG emissions.					
b. Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?					
greenhouse gases? <b>7b. Response:</b> The SCAQMD supports State, Federal and international policies to reduce levels of ozone depleting gases through its Global Warming Policy and rules and has established an interim Greenhouse Gas (GHG) threshold. As indicated in Question A, above, the Project would comply with the City's General Plan 2025 policies and State Building Code provisions designed to reduce GHG emissions. In addition, the Project would comply with all SCAQMD applicable rules and regulations during construction and will not interfere with the State's goals of reducing GHG emissions to 1990 levels by the year 2020 as stated in the AB 32 and an 80 percent reduction in GHG emissions below 1990 levels by 2050 as stated in Executive Order S-3-05. Based on the discussion above, the Project will not conflict with any applicable plan, policy or regulation related to the reduction in the emissions of GHG and thus a less than significant impact will occur directly, indirectly and cumulatively in this regard.					
8. HAZARDS & HAZARDOUS MATERIALS. Would the Project:					
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?					
<ul> <li>8a. Response: (Source: General Plan 2025 Public Safety Element, GP 2025 FPEIR, California Health and Safety Code, Title 49 of the Code of Federal Regulations, California Building Code, Riverside Fire Department EOP, 2002 and Riverside Operational Area – Multi-Jurisdictional LHMP, 2004 Part 1, OEM's Strategic Plan)</li> <li>Some hazardous materials will be used during construction and maintenance. However, the construction materials will be contained or fueled on site. Any spills related to the regular use of construction materials will be contained through best management practices as to not create a significant hazard to the public or the environment. As such, the Project will have a less than significant impact related to the transport, use, or disposal of any hazardous material either directly, indirectly and cumulatively.</li> </ul>

		Incorporated				
of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for		-				
which permits have been granted)?						
9b. Response: (Source: General Plan 2025 Table PF-1 – RPU Projected Domestic Water Supply (AC-FT/YR), Table PF-2 – RPU Projected Water Demand, Table PF-3 – Western Municipal Water District Projected Domestic Water Supply (AC-FT/YR), RPU Map of Water Supply Basins, RPU Urban Water Management Plan, WMWD Urban Water Management Plan )						
The proposed Project is located within the Arlington basin. This protect the telecommunications facility with minimal landscaping. The Project interfere substantially with groundwater recharge given the minimal and related ground mounted equipment, the project will have little or <b>significant impact</b> to groundwater supplies and recharge either direct	will not subs area of the sidemand for wa	tantially deple ite to be impro ater. Therefor	te groundwate oved with ante re, there will b	er supplies or nna structure		
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a			$\square$			
stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?						
<b>9c. Response:</b> The Project will result in minimal physical alterations to the Project site (i.e. through grading, ground disturbance, structures or paving) and would not significantly alter the existing drainage patterns of the site because the Project involves the construction of a wireless telecommunications facility involving improvement of small portion of the site with an antenna structure, minimal erosion or siltation on- or off-site will occur. Therefore, the Project will have a <b>less than significant impact</b> directly, indirectly or cumulatively to existing drainage patterns.						
d. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?						
9d. Response:						
The Project will not directly or indirectly result in any activity or physical alteration of the site or surrounding area, (i.e. through grading, ground disturbance, structures or additional paving) that would alter the existing drainage pattern of the site, alter the course of stream or river, or increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site because the Project consists of a wireless telecommunications facility involving improvement of small portion of the site with an antenna structure. Therefore no flooding on or off-site as a result of the Project will occur and there will be <b>no impact</b> directly, indirectly or cumulatively that would substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site.						
e. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				$\square$		
9e. Response: (Source: Preliminary Grading Plan)						
The Project will not directly or indirectly result in any activity or physical alteration of the site or surrounding area (i.e. through grading, ground disturbance, structures or additional paving) that would create or contribute runoff water which would exceed capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff because the Project consists of a wireless telecommunications facility involving improvement of small portion of the site for an antenna structure. Therefore, the Project will not create or contribute runoff water exceeding capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff the site for an antenna structure. Therefore, the Project will not create or contribute runoff water exceeding capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff and there will be <b>no impact</b> directly, indirectly or cumulatively.						
f. Otherwise substantially degrade water quality?				$\boxtimes$		
<b>9f. Response:</b> The Project will not directly or indirectly result in any activity or j	physical altera	tion of the sit	e or surroundi	ng area, (i.e.		

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
through grading, ground disturbance, structures or additional paving) that would create or contribute runoff water which would substantially degrade water quality because the Project consists of the construction of a wireless telecommunications facility involving improvement of small portion of the site with an antenna structure. Therefore, the Project will not degrade water quality and there will be <b>no impact</b> directly, indirectly or cumulatively.						
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?			$\boxtimes$			
<ul> <li>9g. Response: (Source: General Plan 2025 Figure PS-4 – Flood Hazard Areas, and FEMA Flood Hazard Maps Zone X, Map Number 06065C0705G, effective August 28, 2008)</li> <li>A review of National Flood Insurance Rate Map (Map Number 06065C0705G Effective Date August 28, 2008) and Figure 5.8-2 – Flood Hazard Areas of the General Plan Program FPEIR, shows that the Project is not located within or near a flood hazard area, and does not involve the construction of housing. Further, the subject site is within Zone X, which indicates the site is outside the 0.2% annual flood chance. There will be less than a significant impact caused by this</li> </ul>						
<ul> <li>Project directly, indirectly or cumulatively as it will not place housin</li> <li>h. Place within a 100-year flood hazard area structures which would impede or redirect flood flows?</li> </ul>						
<ul> <li>9h. Response: (Source: General Plan 2025 Figure PS-4 – Flood Hazard Areas, and FEMA Flood Hazard Maps Zone X, Map Number 06065C0705G, effective August 28, 2008)</li> <li>The Project site is not located within or near a flood hazard area as depicted on General Plan 2025 Program FPEIR Figure 5.8-2 – Flood Hazard Areas and the National Flood Insurance Rate Map (Map Number 06065C0705G Effective Date August 28, 2008). Further, the subject site is within Zone X, which indicates the site is outside the 0.2% annual flood chance. Therefore, the Project will not place a structure within a 100-year flood hazard area that would impede or redirect flood flows and less than significant impact will occur directly, indirectly or cumulatively.</li> </ul>						
i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?			$\boxtimes$			
9i. Response: (Source: General Plan 2025 Figure PS-4 – Flood Hazard Areas, and FEMA Flood Hazard Maps Zone X, Map Number 06065C0705G, effective August 28, 2008)         The Project site is not located within or near a flood hazard area as depicted on General Plan 2025 Program FPEIR Figure 5.8-2 – Flood Hazard Areas and the National Flood Insurance Rate Map (Map Number 06065C0705G Effective Date August 28, 2008) or subject to dam inundation as depicted on General Plan 2025 Program FPEIR Figure 5.8-2 – Flood Hazard Areas. Further, the subject site is within Zone X, which indicates the site is outside the 0.2% annual flood chance. Therefore, the Project will not place a structure within a flood hazard or dam inundation area that would expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam and therefore less than significant impact directly, indirectly or cumulatively will occur.         j.       Inundation by seiche, tsunami, or mudflow?						
9j. Response: (Source: GP 2025 FPEIR Chapter 7.5.8 – Hydrology and Water Quality)         Tsunamis are large waves that occur in coastal areas; therefore, since the City is not located in a coastal area, no impacts due to tsunamis will occur directly, indirectly or cumulatively.						
<ul> <li>10. LAND USE AND PLANNING: Would the Project:</li> <li>a. Physically divide an established community?</li> </ul>						
10a.Response: (Source: General Plan 2025 Land Use and Urb Riverside GIS/CADME map layers)	an Design Ele	ement, Project	t site plan, Cit			

The Project consists of the construction of a wireless telecommunications facility on a site currently served by fully improved public streets and other infrastructure and does not involve the subdivision of land or the creation of streets that could alter the existing surrounding pattern of development or an established community. Further, the Project is consistent

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
with the General Plan 2025, the Zoning Code, the Subdivision Therefore, <b>no impact</b> directly, indirectly or cumulatively to an estab		Citywide De		Guidelines.		
<ul> <li>b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the Project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?</li> </ul>						
<ul> <li>The proposed is avoiding of hindgating an environmental effect?</li> <li>10b. Response: (Source: General Plan 2025, General Plan 2025 Figure LU-10 – Land Use Policy Map, Table LU-5 – Zoning/General Plan Consistency Matrix, Title 19 – Zoning Code, Title 17 – Grading Code, Title 20 – Cultural Resources Code, Title 16 – Buildings and Construction and Citywide Design and Sign Guidelines)</li> <li>The Project has been designed to be consistent with the Zoning Code and the Citywide Design Guidelines, with the exception of a height variance. As well, with the recommended conditions of approval, the Project is consistent with the General Plan 2025. This proposal is not a Project of Statewide, Regional or Areawide Significance. Further, this proposal is in compliance with the development standards set forth in the Zoning Code for Wireless Telecommunications Facilities. Application of these standards would ensure that the Project would not have a detrimental impact on adjacent land uses. Through review of the CUP, specific variances would also be considered. In the judgment of the Planning Division, the potential environmental impacts of any variance should be considered less than significant, given that a process for the consideration of variances is specified in the City's Municipal Code. Based on the above-referenced information, the proposed Conditional Use Permit to allow a wireless communication facility would not result in significant adverse environmental impacts. Thus, less than significant impacts will result from this Project.</li> <li>c. Conflict with any applicable habitat conservation plan or natural community conservation plan?</li> <li>10c. Response: (Source: General Plan 2025, General Plan 2025 – Figure LU-10 – Land Use Policy Map, Table LU-5 – Zoning/General Plan Consistency Matrix, Figure LU-7 – Redevelopment Areas, enter appropriate Specific Plan if one, Title 19 – Zoning Code, Title 18 – Subdivision Code, Title 7 – Noise Code, Title 17 – Grading Code, Title 16 – Buildings</li></ul>						
approved local, regional, or State habitat conservation plan.						
11. MINERAL RESOURCES. Would the Project:						
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				$\boxtimes$		
<b>11a. Response:</b> (Source: General Plan 2025 Figure – OS-1 – Mineral Resources) The Project does not involve extraction of mineral resources or substantial grading activity. No mineral resources have been identified on the Project site and there is no historical use of the site or surrounding area for mineral extraction purposes. The Project site is not, nor is it adjacent to, a locally important mineral resource recovery site delineated in the General Plan 2025, specific plan or other land use plan. Therefore, the Project will have <b>no impact</b> on mineral resources directly, indirectly or cumulatively.						
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				$\boxtimes$

12d. Response: (Source: FPEIR Table 5.11-J – Construction I Conditions Report)The primary source of temporary or periodic noise associated with		_		

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
maintenance work. Construction noise typically involves the loudest common urban noise events associated with minimal grading and construction activities anticipated with the construction of the wireless telecommunications facility. Both the General Plan 2025 and Municipal Code Title 7 (Noise Code) limit construction activities to specific times and days of the week and during those specified times, construction activity is subject to the noise standards provided in the Title 7. Considering the short-term nature of construction and through compliance with the provisions of the Noise Code, the temporary and periodic increase in noise levels due to the construction which may result from the Project are considered <b>less than significant</b> directly, indirectly and cumulatively.						
e. For a Project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project expose people residing or working in the Project area to excessive noise levels?				$\boxtimes$		
<ul> <li>12e. Response: (Source: General Plan 2025 Figure N-8 – Riverside and Flabob Airport Noise Contours, Figure N-9         <ul> <li>March ARB Noise Contour, Figure N-10 – Noise/Land Use Noise Compatibility Criteria, RCALUCP, March Air Reserve Base/March inland Port Comprehensive Land Use Plan (1999), Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005))</li> </ul> </li> <li>The Project site is located approximately .44 miles southwesterly of the closest airport (Riverside). Proper noise control in compliance with Title 7 of the Municipal Code will be used to reduce any short-term construction noise levels. There is no long-term excessive noise levels associated with this project. Therefore, the Project will have no impact resulting in a safety hazard for people residing or working in the Project area directly, indirectly or cumulatively.</li> </ul>						
<ul> <li>f. For a Project within the vicinity of a private airstrip, would the Project expose people residing or working in the Project area to excessive noise levels?</li> <li>12f. Response: (Source: General Plan 2025 Figure PS-6 – A)</li> </ul>				, RCALUCP,		
<ul> <li>March Air Reserve Base/March Inland Port Comprehensive Land Use Plan (1999)and Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005)</li> <li>Per the GP 2025 Program FPEIR, there are no private airstrips within the City that would expose people working or residing in the City to excessive noise levels. Because the proposed Project consists of development anticipated under the General Plan 2025, is not located within proximity of a private airstrip, and does not propose a private airstrip, the Project will not expose people residing or working in the City to excessive noise levels related to a private airstrip and would have no impact directly, indirectly or cumulatively.</li> </ul>						
13. <b>POPULATION AND HOUSING.</b> Would the Project:						
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				$\boxtimes$		
13a. Response: (Source: General Plan 2025 Table LU-3 – Land Use Designations, FPEIR Table 5.12-A – SCAG Population and Households Forecast, Table 5.12-B – General Plan Population and Employment Projections– 2025, Table 5.12-C – 2025 General Plan and SCAG Comparisons, Table 5.12-D - General Plan Housing Projections 2025, Capital Improvement Program and SCAG's RCP and RTP)						
The Project is in an urbanized area and does not propose new homes or businesses that would directly induce substantial population growth, and does not involve the addition of new roads or infrastructure that would indirectly induce substantial population growth because the Project consists of the construction of a wireless telecommunications facility. Therefore, this Project will have <b>no impact</b> on population growth either directly or indirectly.						
<ul> <li>b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?</li> <li>13b. Response: (Source: CADME Land Use 2003 Layer)</li> </ul>						

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
The Project will not displace existing housing, necessitating the construction of replacement housing elsewhere because the Project site is proposed on a previously improved site that has no existing housing that will be removed or affected by the proposed Project. Therefore, there will be <b>no impact</b> on existing housing either directly, indirectly or cumulatively.						
c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				$\square$		
<b>13c. Response:</b> (Source: CADME Land Use 2003 Layer) The Project will not displace any people, necessitating the constr Project site is proposed on a previously improved site that has no affected by the proposed Project. Therefore, this Project will have replacement housing either directly, indirectly or cumulatively.	existing hous	ing or residen	ts that will be	removed or		
14. PUBLIC SERVICES.						
Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:						
a. Fire protection?				$\boxtimes$		
Statistics and Ordinance 5948 § 1) The Project consists of the construction of a wireless telecommunic located at 5883 Arlington Avenue to serve this Project. ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------------	--	------------------------------------	--------------

#### Riverside Public Library Service Standards)

The Project consists of the construction of a wireless telecommunications facility. Adequate public facilities and services, including libraries and community centers, are provided to serve this Project. In addition, with implementation of General Plan 2025 policies, compliance with existing codes and standards, and through Park and Recreation and Community Services and Library practices, there will be **no impacts** on the demand for additional public facilities or services either directly, indirectly or cumulatively.

# 15. RECREATION. Image: Second structure a. Would the Project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? Image: Second structure

15a. Response: (Source: General Plan 2025 Figure PR-1 – Parks, Open Spaces and Trails, Table PR-4 – Park and Recreation Facilities, Figure CCM-6 – Master plan of Trails and Bikeways, Parks Master Plan 2003, FPEIR Table 5.14-A – Park and Recreation Facility Types, and Table 5.14-C – Park and Recreation Facilities Funded in the Riverside Renaissance Initiative, Table 5.14-D – Inventory of Existing Community Centers, Riverside Municipal Code Chapter 16.60 - Local Park Development Fees, Bicycle Master Plan May 2007)

The Project will not result in an intensification of land use that would generate any additional demand for park facilities and therefore, there will be **no impact** on the demand for additional recreational facilities either directly, indirectly or cumulatively.

b.	Does the Project include recreational facilities or require the		
	construction or expansion of recreational facilities which		i —
	might have an adverse physical effect on the environment?		l

#### 15b. Response:

The Project will not include new recreational facilities or require the construction or expansion of recreational facilities; therefore, there will be **no impact** directly, indirectly or cumulatively.

16. TRANSPORTATION/TRAFFIC. Would the Project result in:		
Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?		

16a. Response: (Source: General Plan 2025 Figure CCM-4 – Master Plan of Roadways, FPEIR Figure 5.15-4 – Volume to Capacity (V/C) Ratio and Level of Service (LOS) (Typical 2025), Table 5.15-D – Existing and Future Trip Generation Estimates, Table 5.15-H – Existing and Typical Density Scenario Intersection Levels of Service, Table 5.15-I – Conceptual General Plan Intersection Improvement Recommendations, Table 5.15-J – Current Status of Roadways Projected to Operate at LOS E or F in 2025, Table 5.15-K – Freeway Analysis Proposed General Plan, Appendix H – Circulation Element Traffic Study and Traffic Study Appendix, SCAG's RTP)

The Project site is located on a developed and improved site where no increase in intensity of use resulting in any measureable increase in traffic would occur and therefore **no impact** directly, indirectly or cumulatively to the capacity of the existing circulation system will occur.

b. Conflict with an applicable congestion management program, including but not limited to level of service

 $\bowtie$ 

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?				
16b. ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
c. Does the Project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			$\square$	

18c. Response: (Source: FPEIR Section 5 – Environmental Impact Analysis for the General Plan 2025 Program)

Effects on human beings were evaluated as part of the aesthetics, air quality, hydrology & water quality, noise, population and housing, hazards and hazardous materials, and traffic sections of this initial study and found to be less than significant for each of the above sections. Based on the analysis and conclusions in this initial study, the Project will not cause substantial adverse effects, directly or indirectly to human beings. Therefore, potential direct and indirect impacts on human beings that result from the proposed Project are **less than significant**.
