

COMMUNITY & ECONOMIC DEVELOPMENTDEPARTMENT

PLANNING DIVISION

DRAFT NEGATIVE DECLARATION

			WARD: Citywide
1.	Case Number:	P18-0290	
2.	Project Title:	City of Riverside Lighting Standards Update	
3.	Hearing Date:	May 31, 2018 at 9:00 AM	
4.	Written Comments:	Start: May 4, 2018 End: 5:00 PM on May 25, 2018	
5.	Lead Agency:	City of Riverside Community & Economic Development Department Planning Division 3900 Main Street, 3 rd Floor Riverside, CA 92522	
6.	Contact Person: Phone Number:	(951) 826-5264	
7.	Project Location:	The Project is located Citywide.	
8.	Project Applicant/Project	t Sponsor's Name and Address: City of Riverside Community & Economic Development Department Planning Division 3900 Main Street, 3 rd Floor Riverside, CA 92522	

- 9. General Plan Designation: Multiple General Plan designations in Citywide Project.
- 10. **Zoning:** All Zones (Citywide)

11. **Description of Project:**

Proposal by the City of Riverside to amend the Zoning Code (Title 19 of the Riverside Municipal Code) for a comprehensive update to Chapter 19.556 - Lighting. Proposed amendments include, but are not limited to: 1) reorganization and update to bring the existing Code into compliance with State laws and technological advancements; 2) new or modified definitions related to lighting; 3) creation of lighting zones; 4) new design and development standards; 5) new procedures for reviewing lighting plans; and 6) establishing prohibited types of lighting.

The proposal sets forth standards to ensure that outdoor lighting is adequate for safety, security and commerce, while preserving the naturally occurring darkness of the night sky by mitigating artificial sky glow created by glare and light trespass.

Outdoor lighting installed or modified after the effective date of the proposed amendments shall comply with the new requirements. This includes new lighting, replacement lighting, and additions or alterations to existing lighting, whether attached to structures, poles, at grade, or any other location.

12. Surrounding land uses and setting: Briefly describe the project's surroundings:

The project is located Citywide and has a variety of surrounding land uses, zoning and general plan designations.

- 13. Other public agencies whose approval is required (e.g., permits, financial approval, or participation agreement.):
 - a. Riverside County Airport Land Use Commission (ALUC) reviews all legislative proposals that occur within the influence areas of the Airport Land Use Compatibility Plan (ALUCP).

14. Other Environmental Reviews Incorporated by Reference in this Review:

a. The General Plan 2025 Final Program Environmental Impact Report (FPEIR)

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

Aesthetics	Agriculture & Forest Resources	Air Quality
Biological Resources	Cultural Resources	Geology/Soils
Greenhouse Gas Emissions	Hazards & Hazardous Materials	Hydrology/Water Quality
Land Use/Planning	Mineral Resources	Noise
Population/Housing	Public Service	Recreation
Transportation/Traffic	Tribal Cultural Resources	Utilities/Service Systems
Mandatory Findings of Significance		

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation which reflects the independent judgment of the City of Riverside, it is recommended that:

The City of Riverside finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.

The City of Riverside finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

The City of Riverside finds that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

The City of Riverside finds that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

The City of Riverside finds that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

PLANNING DIVISION

ENVIRONMENTAL INITIAL STUDY

EVALUATION OF ENVIRONMENTAL IMPACTS:

- 1) A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- 5) Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. **Impacts Adequately Addressed.** Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. **Mitigation Measures.** For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measure which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.
- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.

- 8) The explanation of each issue should identify:
 - a. the significance criteria or threshold, if any, used to evaluate each question; and
 - b. the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
1. AESTHETICS.					
Would the project:				<u> </u>	
a. Have a substantial adverse effect on a scenic vista?					
1a. Response:					
No Impact. The proposed amendments to the lighting standards a artificial light, thereby reducing overall effects of light pollution. T initiate any physical changes; and the physical development that the restrictive than the current standards. Therefore, the proposed procumulatively.	he proposed (he amended (oject will hav	Code changes d Code would all	lo not, in and ow for is the	of themselves, same or more sta directly, or	
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?					
development that the amended Code would allow for is the same or more restrictive than the current standards. Therefore, the proposed project will have no impact to a scenic resource direct, indirectly or cumulatively. Image: Comparison of the site and its surroundings? c. Substantially degrade the existing visual character or quality of the site and its surroundings? Image: Comparison of the site and its surroundings?					
1c. Response:				1	
No Impact. The proposed project consists of amendments to the ligh would be applicable citywide and are designed to reduce light pollulight. The proposed Code changes do not, in and of themselves, init that the amended Code would allow for is the same or more restrict not degrade the existing visual character of the City and no impact or or quality will occur.	ution, and pro iate any physive than the cu	otect the night s ical changes; an irrent standards	sky from exce nd the physica . Therefore,	essive artificial al development the project will	
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?					
 1d. Response: (Source: General Plan 2025, General Plan 2025, Area, Title 19 – Article VIII – Chapter 19.556 – Lighting, C No Impact. The project would not result in a new source of light of views. No new lighting is directly proposed by the project; nor an article view. for is the same or more restrictive than the current standards. As such, the project will have **no impact** directly, indirectly

or cumulatively which would adversely affect day or nighttime views.

	SUES (AND SUPPORTING FORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
2.	AGRICULTURE AND FOREST RESOURCES:					
	In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information complied by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and the forest carbon measurement methodology provided in the Forest Protocols adopted by the California Air Resources Board. Would the project:					
	a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non- agricultural use?					
of	2a. Response: o Impact. The proposal is an amendment to the City's lighting ordinary land within the City. Therefore, the project will have no in proversion of farmland to non-agricultural uses.					
	b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?					
of the	2b. Response: No Impact. The proposal is an amendment to the City's lighting ordinance, and would not result in the physical development of any land within the City. Therefore the project will not conflict with any existing zoning for agricultural use. Therefore, the project will have no impact directly, indirectly or cumulatively on existing zoning for agricultural uses or Williamson					
	 c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)) timberland (as defined in Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))? 					
dev rezo	2c. Response: Impact. The proposal is an amendment to the City's lighting ordi elopment of any land within the City. Therefore the project will roning of, forest land or timberland. Therefore, the project will have est land, timberland, or timberland zoned for Timberland Production	not conflict w ve no impact	ith any existing	g zoning for, o	or cause	

4

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
d. Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes
2d. Response:				
No Impact. The proposal is an amendment to the City's lighting ordi of any land within the City. Therefore the project will not be resul Furthermore, the City of Riverside has no forest land that can supp timberland. Therefore, no impacts will occur from this project direct loss of forest land or conversion of forest land to non-forest use.	t in the loss oport 10-perce	of forest land of nt native tree of	r conversion cover, nor do	of forest land. es it have any
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?				\boxtimes
2e. Response:				
No Impact . The proposal is an amendment to the City's lighting ordi of any land within the City. Therefore the project will not result in a in conversion of Farmland to non-agricultural use, or conversion of f occur from this project directly, indirectly or cumulatively which agricultural uses, or the conversion of forest land to non-forest use.	ny changes ir orest land to 1	the existing er non-forest use.	vironment th Therefore, n o	at could result impacts will
3. AIR QUALITY.				
Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a. Conflict with or obstruct implementation of the applicable air quality plan?				\boxtimes
3a. Response: (Source: General Plan 2025 FPEIR Table 5.3- South Coast Air Quality Management District's 2007 Air CalEEMod 2007 Model)				
No Impact. The proposal is an amendment to the City's lighting ordi of any land within the City. The project does not directly or indirectl As such, the project does not in conflict with the General Plan 2025 F The proposed project will not conflict or obstruct implementation of will have no impact directly, indirectly or cumulatively to the imple	y create cons rogram "Typ the applicable	truction, gradin ical Growth Sc e air quality pla	g or earthmovenario" or the n, and therefore	ving activities. 2007 AQMP. ore this project
b. Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				\boxtimes
3b. Response (Source: General Plan 2025 FPEIR Table 5.3-B SCA Coast Air Quality Management District's 2007 Air Quality Manag Model)				
No Impact. The proposal is an amendment to the City's lighting ordinair quality standard or contribute substantially to an existing or projic directly or indirectly create construction, grading or earthmoving act more restrictive light standards to reduce impacts related to light point.	ected air qua ivities. The p	lity violation, b roject consists	ecause the pr of the establis	oject does not shment of new

Code would allow for is the same or more restrictive than the current standards. The project will have **no impact** directly, indirectly or cumulatively to ambient air quality, or contribute to an existing air quality violation.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
c. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?						
3c. Response: (Source: General Plan 2025 FPEIR Table 5.3-1 South Coast Air Quality Management District's 2007 Air CalEEMod 2007 Model)	~	~ 0	0.0	· · · · · · · · · · · · · · · · · · ·		
No Impact. The proposal is an amendment to the City's lighting ordinance, and will not result in a cumulatively considerable net increase of any criteria pollutant because the project does not directly or indirectly create construction, grading or earthmoving activities. The project consists of the establishment of new more restrictive light standards to reduce impacts related to light pollution. As such, no impact cumulatively to a net increase of any criteria pollutant will occur.						
d. Expose sensitive receptors to substantial pollutant concentrations?				\boxtimes		
 3d. Response: (Source: General Plan 2025 FPEIR Table 5.3-B SCAQMD CEQA Regional Significance Thresholds, South Coast Air Quality Management District's 2007 Air Quality Management Plan, URBEMIS 2007 Model, CalEEMod 2007 Model) No Impact. The proposal is an amendment to the City's lighting ordinance, and would not expose sensitive receptors to substantial pollutant concentrations because the project does not directly or indirectly create construction, grading or earthmoving activities that would expose sensitive receptors to substantial short-term pollutant concentrations, and because 						
the project consists of consists of the establishment of new more rest pollution. As such, no impact directly, indirectly or cumulatively to				elated to light		
e. Create objectionable odors affecting a substantial number of people?				\boxtimes		
3e. Response:						
people to objectionable odors because no odors will be generated by standards to reduce inappropriate or excessive use of artificial light	No Impact. The proposal is an amendment to the City's lighting ordinance, and would not expose a substantial number of people to objectionable odors because no odors will be generated by the proposed project. The project creates new lighting standards to reduce inappropriate or excessive use of artificial light, thereby reducing overall effects of light pollution. Therefore, no impact related to objectionable odors will occur directly, indirectly or cumulatively.					
		[[
4. BIOLOGICAL RESOURCES. Would the project:						
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?						
4a. Response: (Source: General Plan 2025 – Figure OS-6 – St Habitat Conservation Plans (HCP), Figure OS-7 – MSHO Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP	CP Cores an Area Plans, Plant Spect	d Linkages, Fi Figure 5.4-4 - es Survey Are	igure OS-8 – MSHCP Criu a, Figure 5.4	MSHCP Cell teria Cells and		

No Impact. The proposal is an amendment to the City's lighting ordinance, and would not directly or indirectly result in the physical development of any land within the City. Additionally, the physical development that the amended Code would

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
allow for is the same or more restrictive than the current standards. ' cumulatively on habitat modifications, species identified as a candida plans, and policies or regulations of the California Department of Fis	te, sensitive,	or special status	s species in lo	cal or regional		
 b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? 						
 4b. Response: (Source: General Plan 2025 – Figure OS-6 – Stephen's Kangaroo Rat (SKR) Core Reserve and Other Habitat Conservation Plans (HCP), Figure OS-7 – MSHCP Cores and Linkages, Figure OS-8 – MSHCP Cell Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Area Plans, Figure 5.4-4 - MSHCP Criteria Cells and Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Plant Species Survey Area, Figure 5.4-7 – MSHCP Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP Burrowing Owl Survey Area, MSHCP Section 6.1.2 - Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools) 						
No Impact. The proposal is an amendment to the City's lighting ordi of any land within the City. Additionally, the physical development more restrictive than the current standards. The project will have no community identified in local or regional plans, policies, or regulati or U.S. Fish and Wildlife Service directly, indirectly and cumulative	that the ame impact on an ons, or by the	nded Code wor y riparian habit	ald allow for at or other set	is the same or nsitive natural		
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				\boxtimes		
 4c. Response: (Source: City of Riverside GIS/CADME USGS Quad Map Layer) No Impact. The proposal is an amendment to the City's lighting ordinance, and would not result in the physical development of any land within the City. Additionally, the physical development that the amended Code would allow for is the same or more restrictive than the current standards. The proposed project would have no impact to federally protected wetlands as defined by Section 404 of the Clean Water Act directly, indirectly and cumulatively. 						
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				\boxtimes		
4d. Response: (Source: MSHCP, General Plan 2025 – Figure	OS-7 – MSH	CP Cores and	Linkage)			
No Impact. The proposal is an amendment to the City's lighting ordi of any land within the City. Therefore, the proposal will not result migratory fish or wildlife species or with established native resider native wildlife nursery sites. In addition, the proposed project in beneficial to nocturnal animals who are adversely affected by excess no impact to wildlife movement directly, indirectly and cumulative	in a barrier to at or migrator acludes more vive nighttime	to the movement y wildlife corr restrictive light	nt of any nati idors, or impendenting standar	ve resident or ede the use of ds, which are		
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				\square		
4e. Response: (Source: MSHCP, Title 16 Section 16.72.040 - Mitigation Fee, Title 16 Section 16.40.040 – Establishing Riverside Urban Forest Tree Policy Manual)						

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
No Impact. The project proposes revisions to lighting standards, which are intended to further reduce light pollution. There is no physical development proposed, and the physical development that the amended Code would allow for is the same or more restrictive than the current standards. In addition, the General Plan 2025 includes policies to ensure that future development would not conflict with any local policies or ordinances protecting biological resources, including tree preservation policies. This project has been reviewed against these policies and found to be in compliance. For these reasons, the project will have no impact directly, indirectly and cumulatively on local policies or ordinances protecting biological resources, including tree preservation.						
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?						
4f. Response: (Source: MSHCP, General Plan 2025 – Figure and Other Habitat Conservation Plans (HCP), Stephens' Ka Multiple Species Habitat Conservation Plan and Natural Co Habitat Conservation Plan)	angaroo Rat I	Habitat Conser	vation Plan,	Lake Mathews		
No Impact. The project proposes revisions to lighting standards, which are intended to further reduce light pollution. There is no physical development proposed, and the physical development that the amended Code would allow for is the same or more restrictive than the current standards. Therefore, the project will have no impact on the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan, either directly, indirectly or cumulatively.						
5. CULTURAL RESOURCES. Would the project:						
a. Cause a substantial adverse change in the significance of a historical resource as defined in § 15064.5 of the CEQA Guidelines?						
5a. Response: (Source: GP 2025 FPEIR Table 5.5-A Historica Appendix D, Title 20 of the Riverside Municipal Code)	ıl Districts ar	ad Neighborho	od Conservat	ion Areas and		
No Impact. The proposal is an amendment to the City's lighting ord building demolition. Furthermore, the proposed Code revisions exe granted a Certificate of Appropriateness. As such, the project will h historical resources as defined in Section 15064.5 of the CEQA Guid	mpt projects ave no impa	that are subject	t to Title 20 a	and have been		
b. Cause a substantial adverse change in the significance of an archeological resource pursuant to § 15064.5 of the CEQA Guidelines?				\boxtimes

iv. Landslides?				

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------------	--	------------------------------------	--------------

6iv. Response: (Source: General Plan 2025 FPEIR Figure 5.6-1 – Areas Underlain by Steep Slope, Appendix E – Geotechnical Report, Title 18 – Subdivision Code, Title 17 – Grading Code, Storm Water Pollution Prevention Plan SWPPP)

No Impact. The project proposes revisions to the lighting standard. There is no physical development proposed as part of the project, and therefore the proposal would not pose a risk to areas prone to landslides. Any physical development that the amended Code would allow for is the same or more restrictive than the current standards. There will be **no impact** related to landslides as a result of the project, directly, indirectly and cumulatively.

b. Result in substantial soil erosion or the loss of topsoil?			\boxtimes
6b. Response: (Source: General Plan 2025 FPEIR Figure	e 5.6-1 – Area		e, Figure 5.6-4

 Soils, Table 5.6-B – Soil Types, Title 18 – Subdivision Code, Title 17 – Grading Code, Storm Water Pollution Prevention Plan SWPPP)

No Impact. The proposal is an amendment to the City's lighting ordinance. There is no physical development proposed as part of the project, therefore the project does not involve development, grading activities, or structures that would result in soil erosion or the loss of topsoil. Any physical development that the amended Code would allow for is the same or more restrictive than the current standards. The project will have **no impact** resulting in substantial soil erosion or loss of topsoil directly, indirectly or cumulatively.

c.	Be located on a geologic unit or soil that is unstable, or that		\square
	would become unstable as a result of the project, and		
	potentially result in on- or off-site landslide, lateral		
	spreading, subsidence, liquefaction or collapse?		

6c. Response: (Source: General Plan 2025 Figure PS-1 – Regional Fault Zones, Figure PS-2 – Liquefaction Zones, General Plan 2025 FPEIR Figure PS-3 – Soils with High Shrink-Swell Potential, Figure 5.6-1 - Areas Underlain by Steep Slope, Figure 5.6-4 – Soils, Table 5.6-B – Soil Types, and Appendix E – Geotechnical Report)

No Impact. The proposal is an amendment to the City's lighting ordinance. There is no physical development proposed as part of the project, therefore the project does not involve development, grading activities, or structures that would cause soil to become unstable. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. The project has **no impact** on geologic units or soil that could become unstable and result in an onor off-site landslide, lateral spreading, subsidence, liquefaction or collapse, either directly, indirectly or cumulatively.

d. Be located on expansive soil, as defined in Table 18-1-B of	
the Uniform Building Code (1994), creating substantial risks to life or property?	3

6d. Response: (Source: General Plan 2025 FPEIR Figure 5.6-4 – Soils, Figure 5.6-4 – Soils, Table 5.6-B – Soil Types, Figure 5.6-5 – Soils with High Shrink-Swell Potential, Appendix E – Geotechnical Report, and California Building Code as adopted by the City of Riverside and set out in Title 16 of the Riverside Municipal Code)

No Impact. The project consists of revisions to the lighting standards. There is no physical development proposed as part of the project, therefore it does not involve any construction activities, grading or new structures on expansive soil that could pose risk to life or property. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. As such, the project will have **no impact** resulting in substantial risks to life or property due to expansive soils either directly, indirectly or cumulatively.

e.	Have soils incapable of adequately supporting the use of
	septic tanks or alternative wastewater disposal systems
	where sewers are not available for the disposal of waste
	water?

6e.	Response: (Sour	ce: General Plan	2025 FPEIR Figure	e 5.6-4 – Soils,	<i>Table 5.6-B – S</i>	oil Types)
				,		JI

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact		
No Impact. The project consists of revisions to the lighting standar of the project, and the proposal does not involve any use of septic project will have no impact on or in regards to soils incapable of add wastewater disposal systems.	tanks or alter	native wastewa	ater disposal	systems. The		
7. GREENHOUSE GAS EMISSIONS. Would the project:						
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?						
7a. Response:						
No Impact. The proposed project consists of revisions to the lighting standards, and will not result in any physical development. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. Additionally, the revised lighting standards consider the use of LED lighting, which was previously not allowed or not addressed in the old Code; therefore, it is expected that the new lighting standards would assist in reducing energy consumption. Reduced energy consumption can lead to lower GHG emissions depending on how the energy is produced. The project will not conflict with the City's General Plan policies and statewide Building Code requirements designed to reduce GHG emissions since the project will not result in a net increase in GHG emissions, and it will not interfere with the State's goals of reducing greenhouse gas emissions stated in AB 32 and Executive Orders S-3-05 and B-30-15. The project will have no impact with respect to GHG emissions.						
b. Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?						
7b. Response: No Impact. The proposed project consists of revisions to the lighting standards, and will not result in physical development. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. Additionally, the revised lighting standards consider the use of LED lighting, which was previously not allowed or not addressed in the old Code; therefore, it is expected that the new lighting standards would assist in reducing energy consumption. Reduced energy consumption can lead to lower GHG emissions depending on how the energy is produced. The project will not conflict with the City's General Plan policies and statewide Building Code requirements that reduce GHG emissions. Since the project will not result in a net increase in GHG emissions, it will not conflict with any applicable plan, policy or regulation related to the reduction in the emissions of GHG, and therefore no impact will occur directly, indirectly and cumulatively in this regard.						
8. HAZARDS & HAZARDOUS MATERIALS. Would the project:						
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?						
8a. Response: (Source: General Plan 2025 Public Safety Element, GP 2025 FPEIR, California Health and Safety Code, Title 49 of the Code of Federal Regulations, California Building Code, Riverside Fire Department EOP, 2002 and Riverside Operational Area – Multi-Jurisdictional LHMP, 2004 Part 1, OEM's Strategic Plan)						
No Impact. The proposed project does not involve transport, use, or consists of proposed changes to the lighting standards. As such, the use, or disposal of any hazardous material either directly, indirectly indirectly indirectly.	ne project wil	l have no imp				
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?						

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
---	--------------------------------------	--	------------------------------------	--------------	--

8b. Response: (Source: General Plan 2025 Public Safety Element, GP 2025 FPEIR Tables 5.7 A – D, California Health and Safety Code, Title 49 of the Code of Federal Regulations, California Building Code, City of Riverside's EOP, 2002 and Riverside Operational Area – Multi-Jurisdictional LHMP, 2004 Part 1, OEM's Strategic Plan)

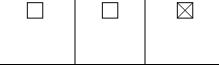

No Impact. The proposed project does not involve the use of any hazardous materials. As such, the project will have **no impact** directly, indirectly or cumulatively for creating a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment.

c.	Emit hazardous emissions or handle hazardous or acutely		\boxtimes
	hazardous materials, substances, or waste within one-quarter		
	mile of an existing or proposed school?		

8c. Response: (Source: General Plan 2025 Public Safety and Education Elements, GP 2025 FPEIR Table 5.7-D -CalARP RMP Facilities in the Project Area, Figure 5.13-2 – RUSD Boundaries, Table 5.13-D RUSD Schools, Figure 5.13-3 AUSD Boundaries, Table 5.13-E AUSD Schools, Figure 5.13-4 – Other School District Boundaries, California Health and Safety Code, Title 49 of the Code of Federal Regulations, California Building Code)

No Impact. The proposed project consists of revisions to the lighting standards, and will not result in any physical development. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. As a result, the proposal does not involve any emission or handling of any hazardous materials, substances or waste within one-quarter mile of an existing school because the proposed project involves revisions to lighting standards. The project will have **no impact** regarding emitting hazardous emissions or handling hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school directly, indirectly or cumulatively.

d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

8d. Response: (Source: General Plan 2025 Figure PS-5 – Hazardous Waste Sites, GP 2025 FPEIR Tables 5.7-A – CERCLIS Facility Information, Figure 5.7-B – Regulated Facilities in TRI Information and 5.7-C – DTSC EnviroStor Database Listed Sites)

No Impact. The proposed project consists of revisions to the lighting standards, and will not result in any physical development. The physical development that the amended Code would allow for is the same or more restrictive than the current standards. As such, the project does not involve hazardous materials sites listed pursuant to Government Code Section 65962.5. The project would have **no impact** on any listed hazardous material sites that could pose a significant hazard to the public or environment, directly, indirectly or cumulatively.

e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

	\square

8e. Response: (Source: General Plan 2025 Figure PS-6 – Airport Safety Zones and Influence Areas, RCALUCP and March Air Reserve Base/March Inland Port Comprehensive Land Use Plan (1999), Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005))

No Impact. The project consists of proposed revisions to the lighting standards to reduce light pollution. The Code revisions will apply to all development proposals in the City (i.e., a "citywide" code revision). There are properties that lie within an Airport Land Use Compatibility Plan (ALUCP); however, the proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The Riverside County Airport Land Use Commission has been provided a copy of the proposed revisions, and will review and determine ALUCP

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact

9. HYDROLOGY AND WATER QUALITY. Would the project:						
a. Violate any water quality standards or waste discharge requirements?				\boxtimes		
9a. Response: (Source: GP 2025 FPEIR Table 5.8-A – Benefi	cial Uses Re	ceiving Water)	•	•		

No Impact. The project consists of proposed revisions to the lighting standards to reduce light pollution, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The project will not directly or indirectly result in physical impacts that would have any effect on water quality or be affected by water quality standards, or waste discharge requirements. The project will have **no impact** directly, indirectly or cumulatively to any water quality standards or waste discharge.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
b. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?					
9b. Response: (Source: General Plan 2025 Table PF-1 – RPU Projected Domestic Water Supply (AC-FT/YR), Table PF-2 – RPU Projected Water Demand, Table PF-3 – Western Municipal Water District Projected Domestic Water Supply (AC-FT/YR), RPU Map of Water Supply Basins, RPU Urban Water Management Plan, WMWD Urban Water Management Plan)

i. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?					
9i. Response: (Source: General Plan 2025 Figure PS-4 – Floo	od Hazard Ar	eas, and FEM	A Flood Haz	ard Maps)	
No Impact. The project consists of proposed revisions to the lighting standards to reduce light pollution, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The project does not involve construction, therefore the project will not place a structure within a flood hazard or dam inundation area that would expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam and therefore no impact directly, indirectly or cumulatively will occur. j. Inundation by seiche, tsunami, or mudflow?					
9j. Response: (Source: GP 2025 FPEIR Chapter 7.5.8 – Hydr	ology and W	ater Quality)			

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
		Incorporated		

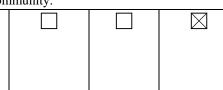

No Impact. Tsunamis are large waves that occur in coastal areas; therefore, since the City is not located in a coastal area, **no impacts** due to tsunamis will occur directly, indirectly or cumulatively. Additionally, the proposed project consists of revisions to the lighting standards to reduce light pollution, and does not include any physical development. The project will not directly or indirectly result in physical alterations. Therefore, **no impact** potential for seiche or mudflow exists either directly, indirectly or cumulatively.

10. LAND USE AND PLANNING:		
Would the project:		
a. Physically divide an established community?		\square

10a.Response: (Source: General Plan 2025 Land Use and Urban Design Element)

No Impact. The project consists of proposed revisions to the lighting standards to reduce light pollution, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The project does not involve the subdivision of land or the creation of streets that could alter the existing surrounding pattern of development or an established community. There will be **no impact** directly, indirectly or cumulatively to an established community.

b. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?

10b. Response: (Source: General Plan 2025, General Plan 2025 Figure LU-10 – Land Use Policy Map, Table LU-5 – Zoning/General Plan Consistency Matrix, Figure LU-7 – Redevelopment Areas, Title 19 – Zoning Code, Title 18 – Subdivision Code, Title 7 – Noise Code, Title 17 – Grading Code, Title 20 – Cultural Resources Code, Title 16 – Buildings and Construction, Citywide Design and Sign Guidelines)

No Impact. The project consists of proposed revisions to existing lighting standards within the Zoning Code to reduce light pollution, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. This project would not conflict with the General Plan 2025, any neighborhood plan, or any specific plan; and would further the General Plan 2025's Policy OS-2.5, which states that the City will "Review and feasibility of creating a 'night-time sky' ordinance to reduce light pollution". This project is not a project of Statewide, Regional or Areawide Significance. For these reasons, this project will have **no impact** on an applicable land use plan, policy or regulation directly, indirectly or cumulatively.

		-	11 1	1	0		
c. Conflict with any applicable habitat conservation plan or natural community conservation plan?	c.		, 11	2	on plan or		\square

10c. Response: (Source: General Plan 2025, General Plan 2025 – Figure LU-10 – Land Use Policy Map, Table LU-5 – Zoning/General Plan Consistency Matrix, Figure LU-7 – Redevelopment Areas, enter appropriate Specific Plan if one, Title 19 – Zoning Code, Title 18 – Subdivision Code, Title 7 – Noise Code, Title 17 – Grading Code, Title 20 – Cultural Resources Code, Title 16 – Buildings and Construction, Citywide Design and Sign Guidelines)

No Impact. The project consists of proposed revisions to existing lighting standards to reduce light pollution, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The revisions are intended to preserve the night sky, which would have positive wildlife benefits, particularly to nocturnal animals. For these reasons, this project will have **no impact** to any habitat conservation plan or natural community conservation plan, directly, indirectly or cumulatively.

f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?						

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
---	--------------------------------------	--	------------------------------------	--------------

12f. Response: (Source: General Plan 2025 Figure PS-6 – Airport Safety Zones and Influence Areas, RCALUCP, March Air Reserve Base/March Inland Port Comprehensive Land Use Plan (1999) and Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005))

No Impact. The project consists of proposed revisions to existing lighting standards to reduce light pollution, and does not consists of physical development. The Code revisions will apply to all development proposals in the City (i.e., a "citywide" code revision). There are properties subject to the Code revisions that lie within an Airport Land Use Compatibility Plan (ALUCP); however, the proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. Additionally, the Riverside County Airport Land Use Commission has been provided a copy of the proposed revisions, and will review and determine ALUCP consistency prior to project approval by the City Council. Because the proposal does not include any physical development, the project will not expose people residing or working in the City to excessive noise levels related to a private airstrip, and would have **no impact** directly, indirectly or cumulatively.

13. POPULATION AND HOUSING. Would the project:		
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?		

13a. Response: (Source: General Plan 2025 Table LU-3 – Land Use Designations, FPEIR Table 5.12-A – SCAG Population and Households Forecast, Table 5.12-B – General Plan Population and Employment Projections– 2025, Table 5.12-C – 2025 General Plan and SCAG Comparisons, Table 5.12-D - General Plan Housing Projections 2025, Capital Improvement Program, SCAG's RCP and RTP)

No Impact. The project consists of proposed revisions to existing lighting standards to reduce light pollution, and does not include any physical development. Therefore the project does not propose new homes or businesses that would directly induce substantial population growth, and does not involve the addition of new roads or infrastructure that would indirectly induce substantial population growth. This project will have **no impact** on population growth, either directly or indirectly.

b. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				\boxtimes
---	--	--	--	-------------

13b. Response:

No Impact. The project consists of proposed revisions to existing lighting standards to reduce light pollution, and does not include any physical development. Therefore, the project will not displace existing housing, necessitating the construction of replacement housing elsewhere. No existing housing will be removed or affected by the proposed project, therefore, there will be **no impact** on existing housing either directly, indirectly or cumulatively.

c. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?

13c. Response:

No Impact. The project consists of proposed revisions to existing lighting standards to reduce light pollution, and does not include any physical development. Therefore, the project will not displace any people, necessitating the construction of replacement housing elsewhere. No existing housing or residents will be removed or affected by the proposed project; therefore, this project will **have no impact** on the displacement of people, and will not necessitate the need for replacement housing, either directly, indirectly or cumulatively.

ISSUES (AND SUPPORTING	Potentially Significant	Less Than Significant	Less Than Significant	No Impact
INFORMATION SOURCES):	Impact	With	Impact	impaci
		Mitigation Incorporated		
14. PUBLIC SERVICES.				
Would the project result in substantial adverse physical impacts				
associated with the provision of new or physically altered				
governmental facilities, need for new or physically altered				
governmental facilities, the construction of which could cause				
significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance				
objectives for any of the public services:				
a. Fire protection?				
14a. Response: (Source: FPEIR Table 5.13-B – Fire Station Statistics and Ordinance 5948 § 1)	Locations, T		Riverside Fi	re Department
No Impact. The project consists of proposed revisions to existing his				
include any physical development. Because the project does not incluse substantial adverse physical impacts associated with governmental				
project will not result in the intensification of land uses, and there				
facilities or services either directly, indirectly or cumulatively.				
b. Police protection?				\square
14b. Response: (Source: General Plan 2025 Figure PS-8 – Nei	ghborhood F	olicing Center	s)	
No Impact. The project consists of proposed revisions to existing li				
include any physical development. Because the project does not inc				
substantial adverse physical impacts associated with governmenta Adequate police facilities and services will not be affected by this pr				
of land use, and there will be no impact on the demand for addition				
or cumulatively.	ai ponee rae	indes of service		cuy, munceuy
c. Schools?				\square
14c. Response: (Source: FPEIR Figure 5.13-2 – RUSD Boun	daries. Table	2 5.13-D – RU	SD. Figure 5	
Boundaries, Table 5.13-E – AUSD, Table 5.13-G – Student and Figure 5.13-4 – Other School District Boundaries)				
No Impact. The project consists of proposed revisions to existing li	ghting standa	ards to reduce 1	ight pollution	and does not
include any physical development. Because the project does not inc				
substantial adverse physical impacts associated with governmental				
will not create or induce residential development, and will not involve				
of school age children. Therefore the project will have no impact or	the demand	for additional s	school faciliti	es or services,
either directly, indirectly or cumulatively.				
d. Parks?				\square
14d. Response: (Source: General Plan 2025 Figure PR-1 – Pa Recreation Facilities, Parks Master Plan 2003, GP 2025 Types, and Table 5.14-C – Park and Recreation Facilities	FPEIR Tab	le 5.14-A – Pa	rk and Recr	eation Facility
No Impact. The project consists of proposed revisions to existing h	ohting stands	ards to reduce 1	ight pollution	and does not
include any physical development. Because the project does not inc				
substantial adverse physical impacts associated with governmental fa				
not propose or induce residential development, and thus will not invo				
the population or induce demands on park facilities. Therefore, ther				

facilities or services either directly, indirectly or cumulatively.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
e. Other public facilities?				\boxtimes

14e. Response: (Source: General Plan 2025 Figure LU-8 – Community Facilities, FPEIR Figure 5.13-5 - Library Facilities, Figure 5.13-6 - Community Centers, Table 5.3-F – Riverside Community Centers, Table 5.13-H – Riverside Public Library Service Standards)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code standards to reduce light pollution, and does not include any physical development. Because the project does not include any physical development, it will not generate any substantial adverse physical impacts associated with governmental facilities and services. The project will not create or induce residential development, and will not involve the addition of any housing units, commercial uses, or industrial uses. The project will not increase demand for public facilities and services, including libraries and community centers. There will be **no impacts** on the demand for additional public facilities or services either directly, indirectly or cumulatively.

15. RECREATION.		
a. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?		\square

15a. Response: (Source: General Plan 2025 Figure PR-1 – Parks, Open Spaces and Trails, Table PR-4 – Park and Recreation Facilities, Figure CCM-6 – Master plan of Trails and Bikeways, Parks Master Plan 2003, FPEIR Table 5.14-A – Park and Recreation Facility Types, and Table 5.14-C – Park and Recreation Facilities Funded in the Riverside Renaissance Initiative, Table 5.14-D – Inventory of Existing Community Centers, Riverside Municipal Code Chapter 16.60 - Local Park Development Fees, Bicycle Master Plan May 2007)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code standards to reduce light pollution, and does not include any physical development. Because the project does not include any physical development, it will not generate any substantial adverse physical impacts on neighborhood and regional park and recreation facilities. The project will not create or induce residential development, and will not involve the addition of any housing units, commercial uses, or industrial uses. The project will not increase demand for public facilities and services, and will not result in an intensification of land use. There will be **no impact** on the demand for additional recreational facilities, either directly, indirectly or cumulatively.

b.	Does the project include recreational facilities or require the		\square
	construction or expansion of recreational facilities which		
	might have an adverse physical effect on the environment?		

15b. Response:

No Impact. The project consists of revisions to the lighting standards in the Zoning Code standards to reduce light pollution, and does not include any physical development. Because the project does not include any physical development, it does not include recreational facilities, or require the construction or expansion of recreational facilities. The project will not create or induce residential development, and will not involve the addition of any housing units, commercial uses, or industrial uses. The project will not increase demand for public facilities and services, and will not result in an intensification of land use. Therefore, there will be **no impact** directly, indirectly or cumulatively on the environment as a result of adverse physical effects from proposed, induced, constructed or expanded recreational facilities.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
16. TRANSPORTATION/TRAFFIC.				
Would the project result in:				
a. Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?				
 16a. Response: (Source: General Plan 2025 Figure CCM-4 Volume to Capacity (V/C) Ratio and Level of Service (LO Trip Generation Estimates, Table 5.15-H – Existing and T Table 5.15-I – Conceptual General Plan Intersection Im Status of Roadways Projected to Operate at LOS E or F General Plan, Appendix H – Circulation Element Traffic No Impact. The project consists of revisions to the lighting standard and does not include any physical development. Because the project does not increase in the intensity of use, and does not result in any m no impact directly, indirectly or cumulatively to the capacity of the 	DS) (Typical 2 Typical Density provement R in 2025, Ta c Study and T s in the Zonin does not inclu- heasurable inclu-	2025), Table 5 ity Scenario Int Recommendation ble 5.15K – I Fraffic Study A ng Code standar and any physica crease in traffic	15-D – Existi tersection Lev ons, Table 5.1 Freeway Ana ppendix, SCA ds to reduce 1 l developmen	ng and Future vels of Service, 15-J – Current lysis Proposed AG's RTP) ight pollution, t, the proposal
 b. Conflict with an applicable congestion management program, including but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways? 				
 16b. Response: (Source: General Plan 2025 Figure CCM-4 Volume to Capacity (V/C) Ratio and Level of Service (LO Trip Generation Estimates, Table 5.15-H – Existing and T Table 5.15-I – Conceptual General Plan Intersection Im Status of Roadways Projected to Operate at LOS E or F General Plan, Appendix H – Circulation Element Traffic No Impact. The project consists of revisions to the lighting standard and does not include any physical development. Because the project impact the level of service, travel demand, or other traffic standard Management Program (CMP). Therefore, there is no impact either 	DS) (Typical 2 Typical Density provement R in 2025, Ta c Study and T s in the Zonin c does not incl ard as define	2025), Table 5. ity Scenario Int Recommendation ble 5.15K – I Fraffic Study A ng Code standar lude any physic d by the River	15-D – Existi tersection Leo ons, Table 5.1 Freeway Ana ppendix, SCA eds to reduce 1 cal developments rside County	ng and Future vels of Service, 15-J – Current lysis Proposed AG's RTP) ight pollution, ent, it does not 's Congestion
 c. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks? 				

16c. Response: (Source: General Plan 2025 Figure PS-6 – Airport Safety Zones and Influence Areas, RCALUCP, March Air Reserve Base/March Inland Port Comprehensive Land Use Plan (1999) and Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005))

No Impact. The project consists of proposed revisions to the lighting standards to reduce light pollution. The proposal does not include any physical development, and all projects proposed within the City will be subject to the new lighting regulations, which are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The Riverside County Airport Land Use Commission has been provided a copy of the proposed revisions, and will review and determine ALUCP consistency prior to project approval by the City Council. Because there is no development associated with the proposed project, it will not change air traffic patterns, increase air traffic levels or change the location of air traffic patterns. As such, this project will have **no impact** directly, indirectly or cumulatively on air traffic patterns and related safety risks.

d.	Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?		\square
	uses (e.g., furni equipment).		

16d. Response:

No Impact. The project consists of revisions to the lighting standards in the Zoning Code to reduce light pollution, and does not include any physical development. Because the project does not include any physical development, it does not include any design features or incompatible uses that would substantially increase hazards. As such, the project will have **no impact** related to traffic or circulation hazards, either directly, indirectly or cumulatively.

e. Result in inadequate emergency access?				\square
---	--	--	--	-----------

16e. Response: (Source: California Department of Transportation Highway Design Manual, Municipal Code, and Fire Code)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code to reduce light pollution, and does not include any physical development. Because the project does not include any physical development, the project cannot create a physical impact that would limit or otherwise result in inadequate emergency access; therefore there will be **no impact** directly, indirectly or cumulatively to emergency access.

f.	Conflict with adopted policies, plans or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise		\square
	decrease the performance or safety of such facilities)?		

16f. Response: (Source: FPEIR, General Plan 2025 Land Use and Urban Design, Circulation and Community Mobility and Education Elements, Bicycle Master Plan, School Safety Program – Walk Safe! – Drive Safe!)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Furthermore, all projects proposed within the City will be subject to the new lighting regulations that are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. Because there is no physical development associated with the proposal, no site modifications will occur that would result in conflicts with adopted policies, plans or programs supporting alternative transportation (e.g. bus turnouts, bicycle racks). As such, the project will have **no impact** directly, indirectly or cumulatively on adopted policies, plans, or programs supporting alternative transportation.

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
17. TRIBAL CULTURAL RESOURCES.					
Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the					
size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
a. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code Section				\boxtimes	
5020.1(k), or					
17a. Response: (AB52 Consultation)					
No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because the project does not involve physical development, the project will not result in an adverse change in a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe. The tribes were consulted and due to the Legislative nature of the project, all tribes either declined consultation or did not respond to the request for interest in consultation. The project will have no impact directly, indirectly or cumulatively on either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe. b. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resources for the resource to a California Native American tribe. b. A resource of the resource to a California Native American tribe.					
17b. Response: (AB52 Consultation) No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because the project does not involve physical development of any land, it will not result in an adverse change in a resource of significance to a California Native American tribe. The tribes were consulted pursuant to the requirements of the Public Resources Code and due, to the nature of the project, declined consultation or did not respond to the request for consultation. The project will have no impact directly, indirectly or cumulatively on a resource of significance to a California Native American tribe.					
18. UTILITIES AND SYSTEM SERVICES. Would the project:					
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				\boxtimes	
18a. Response: (Source: General Plan 2025 Figure PF-2 – Sewer Facilities Map, FPEIR Figure 5.16-5 – Sewer Service Areas, Table 5.16-K - Estimated Future Wastewater Generation for the City of Riverside's Sewer Service Area, Table 5.16-L - Estimated Future Wastewater Generation for the Planning Area Served by WMWD, Figure 5.8-1 – Watersheds, Wastewater Integrated Master Plan and Certified EIR)					
No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because there is no physical development associated with the proposal, it will not exceed wastewater treatment requirements of the Regional Water Quality Control Board (RWQCB). There will be no impact directly, indirectly or cumulatively to wastewater treatment requirements or facilities.					

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				
18b. Response: (Source: General Plan 2025 Table PF-1 – RP Table PF-2 – RPU Projected Water Demand, Table PF-3 – Water Supply (AC-FT/YR), RPU, FPEIR Table 5.16-G Including Water Reliability for 2025, Table 5.16-I - Curr General Plan Projected Water Demand for WMWD Inclu Future Wastewater Generation for the City of Riverside's S Wastewater Generation for the Planning Area Served by 5.16-6 – Sewer Infrastructure and Wastewater Integrated N	Western Mu – General I ent and Proj ding Water I Sewer Servico WMWD, Fig	nicipal Water Plan Projected ected Water U Reliability 2025 e Area & Table ure 5.16-4 – V	District Proje Water Dem Se WMWD, 5, Table 5.16 25.16-L - Est Vater Faciliti	ected Domestic uand for RPU Table 5.16-J - -K - Estimated timated Future

e. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				
18e. Response: (Source: FPEIR Figure 5.16-5 - Sewer Service A K - Estimated Future Wastewater Generation for the Ci Estimated Future Wastewater Generation for the Planning Master Plan and Certified EIR)	ty of Riversi	de's Sewer Se	rvice Area, T	Table 5.16-L -

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact

No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because there is no physical development associated with the proposal, it will not affect or exceed wastewater treatment requirements of (Regional Water Quality Control Board). Therefore, there are **no impact** to the wastewater treatment provider, directly, indirectly or cumulatively will occur.

f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

18f. Response: (Source: FPEIR Table 5.16-A – Existing Landfills and Table 5.16-M – Estimated Future Solid Waste Generation from the Planning Area)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because there is no physical development associated with the proposal, it will not affect future landfill capacity. Therefore, **no impact** to landfill capacity will occur directly, indirectly or cumulatively.

g.	Comply with federal, state, and local statutes and regulations			\square
	related to solid waste?]]	

18g. Response: (Source: California Integrated Waste Management Board 2002 Landfill Facility Compliance Study)

No Impact. The project consists of revisions to the lighting standards in the Zoning Code, and does not include any physical development. Because there is no physical development associated with the proposal, it will not affect or impact the management of solid waste. Therefore, the proposed project would not conflict with any Federal, State, or local regulations related to solid waste, and would have **no impacts** related to solid waste statutes, directly, indirectly or cumulatively.

19. M	ANDATORY FINDINGS OF SIGNIFICANCE.		
a.	Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or an endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?		

19a. Response: (Source: General Plan 2025 – Figure OS-6 – Stephen's Kangaroo Rat (SKR) Core Reserve and Other Habitat Conservation Plans (HCP), Figure OS-7 – MSHCP Cores and Linkages, Figure OS-8 – MSHCP Cell Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Area Plans, Figure 5.4-4 - MSHCP Criteria Cells and Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Plant Species Survey Area, Figure 5.4-7 – MSHCP Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP Burrowing Owl Survey Area, MSHCP Section 6.1.2 -Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools, FPEIR Table 5.5-A Historical Districts and Neighborhood Conservation Areas, Figure 5.5-1 - Archaeological Sensitivity, Figure 5.5-2 -Prehistoric Cultural Resources Sensitivity, Appendix D, Title 20 of the Riverside Municipal Code)

No Impact. The project consists of revision to the lighting standards in the Zoning Code, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. The amendments would further protect the night sky from excessive light pollution, and thus would have beneficial effects on the quality of the environment for wildlife populations. Because there is no physical development associated with the proposal, the project will have **no impact** on the habitat of a fish or wildlife species, fish or wildlife population's ability to maintain self-sustaining levels, the plant or animal community, or number or range of a rare or an endangered plant or animal important to the history or prehistory of California.

b.	Does the project have impacts that are individually limited,		\boxtimes
	but cumulatively considerable? ("Cumulatively		
	considerable" means that the incremental effects of a project		

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact
are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				

19b. Response: (Source: FPEIR Section 6 – Long-Term Effects/ Cumulative Impacts for the General Plan 2025 Program)

No Impact. The project consists of revision to the lighting standards in the Zoning Code, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. In addition, the project is consistent with General Plan 2025. Because there is no development associated with the project, and the development standards are the same or more restrictive on development proposals, there are no anticipated cumulative impacts of the proposed project beyond those previously considered. The proposal will have **no impact** in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.

c.	Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly		
	or indirectly?		

19c. Response: (Source: FPEIR Section 5 – Environmental Impact Analysis for the General Plan 2025 Program)

No Impact. The project consists of revision to the lighting standards in the Zoning Code, and does not include any physical development. The proposed development standards are more restrictive than the existing Code, especially as it relates to backlighting, uplighting, and glare from light sources. Effects on human beings were evaluated as part of the aesthetics, air quality, hydrology & water quality, noise, population and housing, hazards and hazardous materials, and traffic sections of this initial study, and were found to have no impact. Based on the analysis and conclusions in this initial study, the project will have **no impact** on human beings, directly or indirectly.
