PHYSICAL EVIDENCE EXAMINATION REPORT

SUSPECT: DONTAE HAYES

OFFENSE: OFFICER INVOLVED SHOOTING

OFFICER(S): NATHAN ASBURY; PAUL MIRANDA

OFFENSE DATE: 12/31/2013

*I, the undersigned, declare under penalty of perjury: (1) I am employed by the State of California, Department of Justice (DOJ), Bureau of Forensic Services; (2) I conducted an examination of the material described below in the ordinary course of my work as a qualified examiner, according to approved laboratory procedures that include creation of contemporaneous documentation and the technical review of my work; (3) The observable data is set forth in the associated laboratory case record; (4) Any opinions, interpretations, or conclusions in this report are based upon data in the associated laboratory case record and findings listed below.
Note: This laboratory report has been prepared and retained by DOJ in the normal course of business according to DOJ's regular practices and procedures. The Department of Justice Laboratory is accredited by the American Society of Crime Laboratory Directors / Laboratory Accreditation Board (ASCLD/LAB).*

At the direction of the submitting agency, only the agency identified in the mailing address of this report will be allowed access to this case. The submitting agency should notify the Laboratory when the prosecutor's office or others should be included.

SUMMARY/RESULTS

The firearm (BL10) fired the expended cartridge case (BL09A).
The firearm (NA01) fired the expended bullet (BL28).

EVIDENCE

The following evidence was submitted to the Laboratory by Lane of the Riverside Police Department on 01/08/2014:

| <u>Item</u> | <u>Description</u> |
|-------------|---|
| BL09A | One expended CCI brand .45 Auto caliber cartridge case |
| BL10 | Colt Model Government, .45 Auto caliber semiautomatic pistol, S/N 305084-C |
| BL10B | One magazine and five rounds of CCI brand .45 Auto caliber ammunition with full metal jacketed bullets |
| BL28 | One damaged jacketed hollow point bullet |
| NA01 | Springfield Armory Model Operator, .45 Auto caliber semiautomatic pistol, S/N NM211053 |
| NA01-A | One magazine and five rounds of Winchester brand .45 Auto caliber ammunition with jacketed hollow point bullets |
| PM01 | Glock Model 22, .40 S&W caliber semiautomatic pistol, S/N HUM986 |
| PM01-A | One magazine and nine rounds of Winchester brand .40 S&W caliber ammunition with jacketed hollow point bullets |

EXAMINATION

Item BL10 was identified as a Colt Model Government semiautomatic pistol chambered to fire .45 Auto caliber ammunition. The pistol is stained with possible dried blood. A swab of the possible dried blood was collected (S-BL10). The trigger pull measured 4 pounds. The pistol's disconnecter and safeties were found to be working. The capacity of the magazine (BL10B) is seven rounds. The pistol was test fired using this magazine and Laboratory ammunition. The pistol functioned properly during examination and test firing

Item NA01 was identified as a Springfield Armory Model Operator semiautomatic pistol chambered to fire .45 Auto caliber ammunition. The trigger pull measured 4 ¼ pounds. The pistol's disconnecter and safeties were found to be working. The capacity of the magazine (NA01-A) is seven rounds. The pistol was test fired using this magazine and three rounds of ammunition from Item NA01-A. The pistol functioned properly during examination and test firing.

Item PM01 was identified as a Glock Model 22 semiautomatic pistol chambered to fire .40 S&W caliber ammunition. The trigger pull measured 5 ¾ pounds. The pistol's disconnecter and safeties were found to be working. The capacity of the magazine (PM01-A) is fifteen rounds. The pistol was test fired using this magazine and three rounds of ammunition from Item PM01-A. The pistol functioned properly during examination and test firing.

Item BL09A is an expended CCI brand .45 Auto caliber cartridge case. It was microscopically compared to a cartridge case fired from Item BL10. Based on sufficient agreement of individualizing breech face marks, Item BL09A was fired from Item BL10.

Item BL28 is a damaged expended jacketed .45 caliber hollow point bullet. It microscopically compared to bullets test fired from Item BL10 and NA01. Based on sufficient agreement of individualizing characteristics, the pistol (NA01) fired the bullet (BL28).

DISPOSITION

The swab of the pistol (S-BL10) will be stored frozen at the Laboratory for five years and then returned to the submitting agency. The test fires from Items BL10 (TF-BL10), NA01 (TF-NA01), PM01 (TF-PM01) and the remaining items will be returned to the appropriate agency.

Date of Report: January 14, 2014
