UNIFIED PROGRAM CONSOLIDATED FORM
Aboveground Storage Tank Facility Statement
 Notification/Change in Status

Page ___ of ___

I. Facility/Business Information

Facility ID# FA	1	Facility Name	3	Owner Name	111				
Facility Address	103	Owner Mailing Address	113						
City	104	Zip Code	105	City	114	State	115	Zip Code	116
Contact Name	117a	Contact Phone	118a	Contact Email	119a	Owner Phone	112		

Does the facility have an SPCC plan? ⁹²⁰
 (see directions on reverse) Yes No

If yes, date of last SPCC Plan Revision/Review:

If the facility does not have an SPCC plan, is it in progress? Yes No

If yes, expected completion date:

II. Total Facility Capacity (in gallons) ⁹²¹

Facility's total aboveground petroleum product storage tank capacity for all tanks/containers/equipment/systems greater than or equal to 55 gallons (see directions on reverse)

TOTAL CAPACITY
gal

III. Tank Details – Include each aboveground tank that contains a petroleum product or other type of oil (including mineral, animal, or vegetable oils). Attach additional pages should your facility have more tanks.

Aboveground Storage Tank Facility Statement

I. Facility/Business Information

- 1 FACILITY ID NUMBER – This “FA” number is found on your CUPA permit.
- 3 FACILITY NAME - Enter the name of the business, facility or DBA for this site.
- 103 FACILITY ADDRESS - Enter the street address where the aboveground storage tank facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility.
- 104 CITY - Enter the city or unincorporated area in which the aboveground storage tank facility is located.
- 105 ZIP CODE - Enter the zip code of aboveground storage tank facility. The extra 4 digit zip may also be added.
- 111 BUSINESS OWNER NAME - Enter name of business owner. If a corporation, enter the name of the corporation.
- 112 OWNER PHONE - Enter the business owner's phone number, area code first, and any extension.
- 113 BUSINESS OWNER MAILING ADDRESS - Enter the owner's mailing address if different from business site address.
- 114 BUSINESS OWNER CITY - Enter the name of the city for the owner's mailing address.
- 115 OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address.
- 116 BUSINESS OWNER ZIP CODE - Enter the zip code for the owner's address. The extra 4 digit zip may also be added.
- 117a CONTACT NAME - Enter the name of the person who receives Aboveground Storage Tank correspondence.
- 118a CONTACT PHONE - Enter the phone number, area code first, and any extension.
- 119a CONTACT EMAIL – Enter the email address of the contact in 117a, if the contact has one
- 920 DOES THE FACILITY HAVE AN SPCC PLAN – Check the box. A Spill Prevention, Control, and Countermeasure (SPCC) Plan is a carefully thought-out plan, prepared in accordance with the guidelines contained in U.S. Environmental Protection Agency's Web site at <http://www.epa.gov/oilspill/spcc.htm>. This plan discusses procedures, methods, and equipment in place at the facility to prevent discharges of petroleum from reaching navigable waters. A complete copy of the SPCC plan must be maintained on site. In the space next to this box, enter the date that you last reviewed or revised your facility's SPCC plan.

II. Total Facility Capacity

- 921 TOTAL FACILITY CAPACITY – Enter the total aboveground storage tank capacity (in gallons) of petroleum products and other oils (such as mineral, animal, and vegetable oils) at the facility. Aboveground storage tank means a tank that has the capacity to store 55 gallons or more of petroleum and that is substantially or totally above the surface of the ground. Petroleum includes waste oil. Storage includes standby storage, seasonal storage, and temporary storage. Container types could be an aboveground tank, 55-gallon drums, or an emergency generator fuel tank. For example, a facility may have petroleum products stored only in 55-gallon drums, but if there are 24 drums, then the total capacity is 55 gallons x 24 = 1,320 gallons and the facility would qualify as a tank facility. In another example, a facility may have three 240-gallon aboveground tanks containing petroleum products and eleven 55-gallon drums of petroleum products and still qualify as a tank facility. Enter the total **capacity** and not the amount actually stored. For instance, the entire 2,000 gallons of an aboveground storage tank with a capacity of 2,000 gallons would be counted even if the tank never actually contained more than 500 gallons.

III. Tank Details

- 922 TANK ID# - Enter a unique tank identification number. You may create your own numbering system. (You don't need to assign numbers for 55-gallon drums.)
- 923 CONTENTS - Enter the contents (e.g. DIESEL, GASOLINE, WASTE OIL, etc.) of the aboveground storage tank.
- 924 CAPACITY – Enter the capacity of the aboveground storage tank (in gallons).
- 925 TANK LOCATION – Enter general location (e.g. EAST, WEST, NORTH, SOUTH) of the tank at your facility.
- 926 YEAR INSTALLED – Enter the year the aboveground storage tank was installed.
- 927 TANK TYPE - Check the construction type or enter the material used to construct the aboveground storage tank. If the petroleum product is contained in a “non-tank” container such as oil-filled operational, process, or electrical equipment, indicate this under “Other.” The aggregate amount of petroleum products contained in 55-gallon drums can be entered on one line, with “Other” marked as the tank type and “55-gallon drums” given as the tank description.
- 928 SECONDARY CONTAINMENT – Check the appropriate box if the tank has secondary containment.

IV. Signature

- 136 APPLICANT NAME – Print or type the full name of the person signing the form.
- 134 DATE – Enter the date (MM/DD/YYYY) the form was signed.

APPLICANT SIGNATURE – The application form must be signed in the space provided.
