

Riverside Community Science

Wild Riverside Bioblitz Bingo 2020

September 5th-13th is California Biodiversity Week! Riverside is a part of a “biodiversity hotspot.” That means we have many different species in our area. Can you find the animals and plants listed below? They may be in your backyard, in your neighborhood, or at a local park. Can you get five in a row to make Bingo? You can use this card on its own or upload your observations with a photo to [iNaturalist.org](https://www.inaturalist.org). Have fun and be safe, making sure you follow all local regulations for COVID-19!
