

# **NOTICE OF PUBLIC HEARING CITY OF RIVERSIDE PUBLIC UTILITIES RENEWAL OF THE WATER CONSERVATION SURCHARGE**

For over 100 years, the delivery of safe and reliable water to its customers has been an essential service of the City of Riverside Public Utilities Department (RPU).

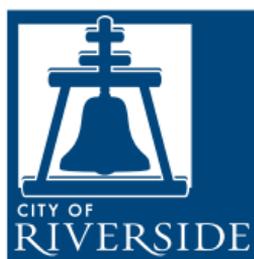

On May 25, 2004, the City Council adopted the 10-year Water Conservation Surcharge to serve the growing need for water conservation in the City of Riverside. The Water Conservation Surcharge is a 1.5% surcharge applied to all residential and commercial RPU water customer accounts and is utilized for:

- Conservation, education, and water use efficiency programs
- Research, development, and demonstration programs to advance science and technology with respect to water conservation

The results of the efforts funded through the Water Conservation Surcharge have been highly successful and have culminated in a combined lifetime savings of over 9 billion gallons of water. This reduction helps RPU meet its state mandated water conservation goals and decreases RPU's need for costly imported water.

RPU is proposing to renew the Water Conservation Surcharge to continue the City's ongoing water conservation efforts by eliminating the expiration date of May 31, 2014.
